DIRECTIONS FOR USE

It is a violation of Federal law to use this product on a manner inconsistent with its labeling.

Reentry into treated swimming pools/spas is prohibited above levels of 3.0 ppm.

For treatment of freshly filled pools or for superchlorination of water free of visible algae, add 2 oz. of Iso Clor II Super Stabilized Chlorinating Granules per 1,000 gallons of pool water by sprinkling it over a wide area of pool water surface. This dosage will provide about 8.75 ppm (parts per million) of chlorine to help satisfy the water's chlorine demand. After this treatment, bathers should not be allowed to enter the pool until the chlorine residual falls to 2 ppm (parts per million) or less. For subsequent use, add 1 1/4 oz. to 2 1/2 oz. of Iso Clor II Super Stabilized Chlorinating Granules per 10,000 gallons of pool water or as needed to maintain a chlorine residual of 1.0 to 1.5 ppm. Check water for chlorine content at regular intervals with a pool water test kit. During extreme heat or with heavy bather loads, water should be checked every 2 hours. Maintain a pH level of 7.2 to 7.6 for best results. Always distribute granules over an extensive area of pool water surface.

For use in wader or splasher pools, the recommended daily dosage is the rate of 1/2 ounce per 750 gallons of water.
