US ENVIRONMENTAL PROTECTION AGENCY OFFICE OF PESTICIDES PROGRAMS REGISTRATION DIVISION (75-767) WASHINGTON, DC 20460	EPA REGISTRATION NO. 3525-108	DATE OF ISSUANCE SEP 30 1994
	TERM OF ISSUANCE	
NOTICE OF PESTICIDE: <input type="checkbox"/> REGISTRATION <input checked="" type="checkbox"/> REREGISTRATION <i>(Under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended)</i>		
NAME OF PESTICIDE PRODUCT TARRY 7-DAY STABILIZED CHLORINATING BIG TABS		

NAME AND ADDRESS OF REGISTRANT (Include ZIP code)

QUALCO, INC.
225 Passaic Street
Passaic, NJ 07055

NOTE: Changes in labeling formula differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above U.S. EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby Registered/Reregistered under the Federal Insecticide, Fungicide, and Rodenticide Act.

A copy of the labeling accepted in connection with this Registration/Reregistration is returned herewith.

Registration is in no way to be construed as an indorsement or approval of this product by this Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

Based on your response to the Reregistration Eligibility Document, EPA has reregistered the above named product subject to the comments recorded in the succeeding paragraph. This action is taken under the authority of section 4(g)(2)(C) of the Federal Insecticide, Fungicide, and Rodenticide Act, as amended. Reregistration under this section does not eliminate the need for continual reassessment of pesticides. EPA may require submission of data at any time to maintain the registration of your product.

Make the following labeling changes before you release the product for shipment:

1. Refer to the enclosed Attachment A for the necessary revisions to the Precautionary Statements for the subject product.
2. Revise the Environmental Hazards statement to read: "This pesticide is toxic to fish and other aquatic organism. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or other waters

ATTACHMENT IS APPLICABLE

SIGNATURE OF APPROVING OFFICIAL

unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA."

A stamped copy of the product label is enclosed for your records.

Submit one copy of the final printed labeling before releasing the product in channels of trade with the revised labeling.

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA sec. 6(e). Your release for shipment of the product constitutes acceptance of these conditions.

PHYSICAL AND CHEMICAL HAZARDS

DANGER: STRONG OXIDIZING AGENT. Mix only with water. Use clean, dry utensils. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire and explosion. Contamination with moisture, organic matter or other chemicals may start a chemical reaction with generation of heat, liberation of hazardous gases, and possible generation of fire and explosion. In case of contamination or decomposition, do not reseat container. Isolate container (if possible) in open air or well ventilated area. Flood with large volumes of water to dissolve all material before discarding container.

ENVIRONMENTAL HAZARDS

This pesticide is toxic to fish and aquatic organisms. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or public waters unless this product is specifically identified and addressed in an NPDES permit. Do not discharge effluent containing this product to sewer systems without previously notifying the sewage treatment plant authority. For guidance, contact your State Water Board or Regional Office of the E.P.A.

STORAGE AND DISPOSAL

STORAGE: Keep this product dry in a tightly closed container when not in use. Store in a cool, dry, well ventilated area away from heat and open flame. In case of decomposition, do not reseat container. Isolate container (if possible) in open air or well ventilated area. Flood with large volumes of water to dissolve all material before discarding container. Do not reuse empty container but place in trash collection. Do not contaminate food or feed by storage, disposal or cleaning of equipment.

PESTICIDE DISPOSAL: Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixture or residue is a violation of Federal law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency or the Hazardous Waste representative at the nearest E.P.A. Regional Office for guidance.

CHEMICAL PROPERTIES

**Contains 89% Available Chlorine / Soluble in all Pool Water
No Alkal Build-up / Long-Lasting Chlorine Residual
Slow Dissolving / For use in Automatic or Floating Dispensers**

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Reentry into treated swimming pools/spas is prohibited above levels of 3.0 ppm. Once-A-Week Tarry 7-Day Stabilized Chlorinating Big Tablets are to be used as a disinfectant and algae control in pool water. They are long-lasting and are intended to slowly meter chlorine into pool water. In order to receive its maximum effect, use as follows:

1. Superchlorinate the pool water with Coastal's fast acting Blast One Shot Shock Treatment, or other chlorinating product. Follow label directions for these products. Do not enter pool until the chlorine residual drops to 2.0 ppm (parts per million).
2. Using Coastal Chlorine Stabilizer, adjust the cyanuric acid level in pool water to 35 ppm, following label directions.
3. Adjust the pH to the ideal range of 7.2 to 7.6 with Coastal pH Plus if the pH is below 7.2 or pH Minus if the pH is above 7.6.
4. Add one Once-A-Week Tarry 7-Day Stabilized Chlorinating Big Tablet per 7,500 gallons of pool water into floating dispenser every week, or as needed as determined by a chlorine test kit to maintain a 1.0 to 1.5 ppm (parts per million) residual chlorine. Check water for chlorine content at regular intervals. During extreme heat or with heavy bather loads, water should be checked every 2 hours. Maintain a pH level of 7.2 to 7.6 for best results.

One Tarry Chlorinating Big Tablet weighs approximately 5-1/8 ounces (150 grams) and WILL LAST APPROXIMATELY ONE WEEK DEPENDING ON TEMPERATURE, BATHER LOAD AND AMOUNT OF WATER FLOW.

Tablets should never be thrown directly into pool as they may cause spotting or bleaching. Not recommended for splasher or wader pools.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

DANGER: Keep Out of Reach of Children. Slightly corrosive. Causes skin and eye damage. May be fatal if swallowed. Do not get in eyes, on skin or on clothing. Do not handle with bare hands. While handling, wear rubber gloves and goggles or face shield and use only thoroughly clean, dry utensils. Irritating to nose and throat. Avoid breathing dust and fumes. Remove and wash contaminated clothing before reuse.
