

STABILIZED
chlorinating
 CONCENTRATED GRANULES
 BACTERICIDE-ALGAEICIDE-DISINFECTANT

CHEMICALS FOR
Spas
N' Hot tubs

ACTIVE INGREDIENT:
 Sodium Dichloro-s-triazinetriene Dihydrate 99.0%
 INERT INGREDIENTS 1.0%
 TOTAL 100%
 *Available Chlorine..... 55%

KEEP OUT OF REACH OF CHILDREN DANGER	
FIRST AID STATEMENT	
IF SWALLOWED	Call a poison control center or doctor immediately for treatment advice. Have person sip glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to an unconscious person.
IF IN EYES	Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.
IF ON SKIN OR CLOTHING	Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.
IF INHALED	Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth if possible. Call a poison control center or doctor for further treatment advice.
POISON LINE NUMBER	Have the product container or label with you when calling the poison control center or doctor, or going for treatment. You may also contact 973-473-1222 for further questions.
NOTE TO PHYSICIAN	Probable mucosal damage may contraindicate the use of gastric lavage.

Net Weight: 15 oz. (425 grams)

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Reentry into treated swimming pools/spas is prohibited above levels of 3.0 ppm. Recommended for spas and hot tubs operating at temperatures between 90 F-105 F.
START-UP: When starting up a reopened, freshly filled spa or hot tub, make sure the filtration system is clean and operating properly. Then adjust and maintain the pH in the range of 7.2 to 7.8 using Coastal pH Minus or pH Plus as indicated by a chemical test kit for spas and hot tubs. Adjust and maintain total alkalinity at 80-100 ppm. Superchlorinate by adding 1 oz. of Stabilized Chlorinating Concentrated Granules per 500 gallons. Repeat this step, if necessary, to establish a positive free chlorine residual of 1.0 to 3.0 ppm.
DAILY: Add Stabilized Chlorinating Concentrated Granules prior to each use as needed based on testing with a chemical test kit to maintain a free chlorine residual of 1.0 to 3.0 ppm. A suggested dosage of 1/2 oz. per 500 gallons provides this residual and should be added as indicated by daily tests for chlorine residual. The dosage required to maintain 1.0 to 3.0 ppm free chlorine residual may vary due to unusual conditions, such as high bather loads. Therefore, frequent use of a chemical test kit is recommended. Using a test kit as a guide, maintain the pH within the 7.2 to 7.8 range and total alkalinity at 80 to 100 ppm. In general 1/4 oz. Stabilized Chlorinating Granules per 500 gallons of water will raise the chlorine residual by 1.0 ppm. After daily use has ceased, add 1/2 oz. to 1 oz. Stabilized Chlorinating Granules per 500 gallons of water. This should be performed with circulating system operating and aeration shut off.
SUPERCHLORINATION: Use 1 oz. Stabilized Chlorinating Granules per 500 gallons, either after each use, when algae appears, chlorine odors are noted or after high bather loads occur. Repeat if necessary to establish a positive free chlorine residual. Do not use spa or hot tub until the chlorine residual has dropped below 3.0 ppm.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS
DANGER Keep Out Of Reach Of Children. **CORROSIVE.** Causes irreversible eye damage and skin burns. May be fatal if inhaled. Harmful if swallowed or absorbed through skin. Do not get in eyes, on skin or on clothing. Do not breathe dust, vapor or spray mist. Wear goggles, face shield, or safety glasses. Wash thoroughly with soap and water after handling. Remove contaminated clothing and wash before reuse.

PHYSICAL AND CHEMICAL HAZARDS

STRONG OXIDIZING AGENT. Mix only with water. Use clean, dry utensils. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic matter, or other chemicals may start a chemical reaction with generation of heat, liberation of hazardous gases, and possible generation of fire and explosion. In case of contamination or decomposition, do not reuse container. Isolate container, if possible, in open air or well ventilated area. Flood with large volumes of water to dissolve all material before discarding container.

ENVIRONMENTAL HAZARDS

This pesticide is toxic to fish and other aquatic organism. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or public waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance, contact your State Water Board or Regional Office of the EPA.

STORAGE AND DISPOSAL

Keep product dry in tightly closed container when not in use. Store in a cool, dry, well ventilated area away from heat and open flame. In case of decomposition, do not reuse container. Isolate container, if possible, in open air or well ventilated area. Flood with large volumes of water to dissolve all material before discarding this container. Do not reuse empty container, but place in trash collection. Do not contaminate food or feed by storage, disposal or cleaning of equipment. Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixture or rinsate is a violation of Federal law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.
