Subject: Labeling Notification per Pesticide Registration Notice (PRN) 98-10 - Updating the Format of the Label and Adding Marketing Claims
Product Name: STABILIZED CHLORINATING CONCENTRATED GRANULES
Admin Number: 3525-116
EPA Receipt Date: 03/13/2025
Action Case Number: 00646880

Dear Debbie Schaub:

The U.S. Environmental Protection Agency is in receipt of your application for notification under Pesticide Registration Notice 98-10 for the above referenced product. The EPA has conducted a review of this request for its applicability under PRN 98-10 and finds that the action requested falls within the scope of PRN 98-10.

The labeling submitted with this application has been stamped "Notification" and will be placed in our records.

Should you wish to add/retain a reference to your company's website on your label, then please be aware that the website becomes labeling under the Federal Insecticide, Fungicide, and Rodenticide Act and is subject to review by the EPA. If the website is false or misleading, the product will be considered to be misbranded and sale or distribution of the product is unlawful under FIFRA section 12(a)(1)(E). 40 CFR § 156.10(a)(5) lists examples of statements the EPA may consider false or misleading. In addition, regardless of whether a website is referenced on your product's label, claims made on the website may not substantially differ from those claims approved through the registration process. Therefore, should the EPA find or if it is brought to our attention that a website contains statements or claims substantially differing from statements or claims made in connection with obtaining a FIFRA section 3 registration, the website will be referred to the EPA's Office of Enforcement and Compliance Assurance.

If you have questions, please contact Demson Fuller via email at fuller.demson@epa.gov.

Sincerely,

Aline Heffernan, Senior Regulatory Advisor
RMB1, AD
Office of Pesticide Programs

NOTIFICATION

3525-116

The applicant has certified that no changes, other than those reported to the Agency have been made to the labeling. The Agency acknowledges this notification by letter dated:

04/04/2025

ACTIVE INGREDIENT

Sodium Dichloro-s-triazinetriene Dihydrate.....99%

OTHER INGREDIENTS.....1%

TOTAL 100%

Available Chlorine.....55.0%

KEEP OUT OF REACH OF CHILDREN

DANGER

See back panel for additional precautionary and first aid statements.

NET WEIGHT: _____

{BACK PANEL}

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Reentry into treated swimming pools/spas is prohibited above levels of 3.0 ppm.

Recommended for spas and hot tubs operating at temperatures between 90oF-105oF.

START-UP: When starting up a reopened, freshly filled spa or hot tub, make sure the filtration system is clean and operating properly. Then adjust and maintain the pH in the range of 7.2 to 7.8 using Coastal pH Minus or pH Plus as indicated by a chemical test kit for spas and hot tubs. Adjust and maintain total alkalinity at 80-100 ppm. Superchlorinate by adding 1 oz. of Stabilized Chlorinating Concentrated Granules per 500 gallons. Repeat this step, if necessary, to establish a positive free chlorine residual of 1.0 to 3.0 ppm.

DAILY: Add Stabilized Chlorinating Concentrated Granules prior to each use as needed based on testing with a chemical test kit to maintain a free chlorine residual of 1.0 to 3.0 ppm. A suggested

dosage of 1/2 oz. per 500 gallons provides this residual and should be added as indicated by daily tests for chlorine residual. The dosage required to maintain 1.0 to 3.0 ppm free chlorine residual may vary due to unusual conditions, such as high bather loads. Therefore, frequent use of a chemical test kit is recommended. Using a test kit as a guide, maintain the pH within the 7.2 to 7.8 range and total alkalinity at 80 to 100 ppm. In general 1/4 oz. Stabilized Chlorinating Granules per 500 gallons of water will raise the chlorine residual by 1.0 ppm. After daily use has ceased, add 1/2 oz. to 1 oz. Stabilized Chlorinating Granules per 500 gallons of water. This should be performed with circulating system operating and aeration shut off.

SUPERCHLORINATION: Use 1 oz. Stabilized Chlorinating Granules per 500 gallons, either after each use, when algae appears, chlorine odors are noted or after high bather loads occur. Repeat if necessary to establish a positive free chlorine residual. Do not use spa or hot tub until the chlorine residual has dropped below 3.0 ppm.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

DANGER: Keep Out Of Reach Of Children. **CORROSIVE.** Causes irreversible eye damage and skin burns. May be fatal if inhaled. Harmful if swallowed or absorbed through skin. Do not get in eyes, on skin or on clothing. Do not breathe dust, vapor or spray mist. Wear goggles, face shield or safety glasses. Wash thoroughly with soap and water after handling. Remove contaminated clothing and wash before reuse.

FIRST AID

IF SWALLOWED: Call a poison control center or doctor immediately for treatment advice. Have person sip glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to an unconscious person. **IF IN EYES:** Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice. **IF ON SKIN OR CLOTHING:** Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice. **IF INHALED:** Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth if possible. Call a poison control center or doctor for further treatment advice. **HOT LINE NUMBER:** Have the product container or label with you when calling the poison control center or doctor, or going for treatment. You may also contact 973-473-1222 for further questions. **NOTE TO PHYSICIAN:** Probable mucosal damage may contraindicate the use of gastric lavage.

PHYSICAL AND CHEMICAL HAZARDS

STRONG OXIDIZING AGENT. Mix only with water. Use clean, dry utensils. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture , organic matter, or other chemicals may start a chemical reaction with generation of heat, liberation of hazardous gases, and possible generation of fire and explosion. In case of contamination or decomposition, do not reseal container. Isolate container, if possible, in open air or well ventilated area. Flood with large volumes of water to dissolve all material before discarding container.

ENVIRONMENTAL HAZARDS

This pesticide is toxic to fish and other aquatic organism. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance, contact your State Water Board or Regional Office of the EPA.

STORAGE AND DISPOSAL

STORAGE: Keep product dry in tightly closed container when not in use. Store in a cool, dry, well ventilated area away from heat and open flame. NONREFILLABLE CONTAINER. IF EMPTY: Do not reuse or refill this container. Place in trash or offer for recycling, if available. IF PARTLY FILLED: Call your local solid waste agency or 1-800-CLEANUP for disposal instructions. Never place unused product down any indoor or outdoor drain.
