Subject: Labeling Notification per Pesticide Registration Notice (PRN) 98-10 - Minor Labeling Revisions
Product Name: TARRY LONG LAST. INDIVIDUALIZED CHLORINATING 8OZ. TABLETS
Admin Number: 3525-120
EPA Receipt Date: 11/12/2024
Action Case Number: 00638361

Dear Debbie Schuab:

The U.S. Environmental Protection Agency is in receipt of your application for notification under Pesticide Registration Notice 98-10 for the above referenced product. The EPA has conducted a review of this request for its applicability under PRN 98-10 and finds that the action requested falls within the scope of PRN 98-10.

The labeling submitted with this application has been stamped "Notification" and will be placed in our records.

Should you wish to add/retain a reference to your company's website on your label, then please be aware that the website becomes labeling under the Federal Insecticide, Fungicide, and Rodenticide Act and is subject to review by the EPA. If the website is false or misleading, the product will be considered to be misbranded and sale or distribution of the product is unlawful under FIFRA section 12(a)(1)(E). 40 CFR § 156.10(a)(5) lists examples of statements the EPA may consider false or misleading. In addition, regardless of whether a website is referenced on your product's label, claims made on the website may not substantially differ from those claims approved through the registration process. Therefore, should the EPA find or if it is brought to our attention that a website contains statements or claims substantially differing from statements or claims made in connection with obtaining a FIFRA section 3 registration, the website will be referred to the EPA's Office of Enforcement and Compliance Assurance.

If you have questions, please contact Terria Northern via email at northern.terria@epa.gov.

Sincerely,

Terria Northern, RM Team 34

KEEP OUT OF REACH OF CHILDREN

DANGER

FIRST AID

IF SWALLOWED: Call a poison control center or doctor immediately for treatment advice.

Have person sip glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to an unconscious person.

IF IN EYES: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice. IF ON SKIN OR CLOTHING: Take off

contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice. IF INHALED: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth, if possible. Call a poison control center or doctor for further treatment advice. HOT LINE NUMBER: Have the product container with you when calling the poison control center or doctor, or going for treatment. You may also contact 973-473-1222 for further questions. NOTE TO PHYSICIAN: Probable mucosal damage may contraindicate the use of gastric lavage.

	{15 lbs. (6.80 kg)}	{16 lbs. (7.26 kg)}	{25 lbs. (11.34 kg)}
	{50 lbs. (22.68 kg)}	{100 lbs. (45.36 kg)}	{220 lbs. (99.79 kg)}
	{235 lbs. (106.6 kg)}		

CHEMICAL PROPERTIES

{Contains 89% Available Chlorine}

{Soluble in All Pool Water}

{No Alkali Build-Up}

{Long-Lasting Chlorine Residual}{Slow Dissolving}

{For Use In Automatic or Floating Dispensers}

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Re-entry into treated swimming pools/spas is prohibited above levels of 3.0 ppm.

This product is to be used as a disinfectant and algae control in pool water. Product is long-lasting and is intended to slowly meter chlorine into pool water. This product is intended for use in a tablet dispenser, in-line chlorinator, in-line feeder or other similar dispenser. In order to receive its maximum effect, use as follows:

1. Superchlorinate the pool water with a fast acting shock treatment such as {brand name}{Coastal Blast One Shot Shock Treatment}{Utikem One Shot Shock Treatment}{Pool Trol Shock Treatment} or other chlorinating product, following label directions for that product. Do not enter pool until the chlorine residual drops to 2.0 ppm (parts per million).
2. Using {brand name}Stabilizer, adjust the cyanuric acid level to pool water to 35 ppm, following label directions.
3. Adjust the pH to the ideal range of 7.2 to 7.6 with {brand name} pH Plus if the pH is below 7.2 or {brand name} pH Minus if the pH is above 7.6.
4. Suggested dosage is one {tablet}{stick} per 11,500 gallons of pool water per week. Add tablets to a floating dispenser, in-line feeder or similar as needed as determined by a chlorine {test kit}{test strips} to maintain a 1.0 to 1.5 ppm (parts per million) residual chlorine. Check water for chlorine content at regular intervals. This dosage may vary due to unusual conditions such as heavy bather loads, heavy rains or high temperatures. During these conditions, water should be checked every 2 hours. Maintain a pH level of 7.2 to 7.6 for best results.

One {tablet}{stick} weighs approximately 8 oz. (227 grams) and will last approximately one week depending on temperature, bather load and amount of water flow. {Tablets}{Sticks} should never be thrown directly into pool as they may cause spotting or bleaching. Not recommended for splashers or wader pools.

PRECAUTIONARY STATEMENTS

DANGER: Keep Out Of Reach Of Children. Corrosive. Causes irreversible eye damage and skin burns. May be fatal if absorbed through skin. May be fatal if inhaled. Do not breathe dust or spray mists. Irritating to nose and throat. Harmful if swallowed. Do not get in eyes, on skin or on clothing. Wear goggles or face shield, protective clothing and rubber gloves when handling this product. Wash thoroughly with soap and water after handling and before eating, drinking or using tobacco. Remove contaminated clothing and wash before reuse.

PHYSICAL AND CHEMICAL HAZARDS

STRONG OXIDIZING AGENT. Mix only with water. Use clean, dry utensils. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic matter, or other chemicals may start a chemical reaction with generation of heat, liberation of hazardous gases, and possible generation of fire and explosion. In case of contamination or decomposition, do not reseal container. Isolate container, if possible, in open air or well ventilated area. Flood with large volumes of water to dissolve all material before discarding container.

ENVIRONMENTAL HAZARDS

This pesticide is toxic to fish and other aquatic organism. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance, contact your State Water Board or Regional Office of the EPA.

STORAGE AND DISPOSAL

STORAGE: Keep product dry in tightly closed container when not in use. Store in a cool, dry, well ventilated area away from heat and open flame. **NONREFILLABLE CONTAINER: IF EMPTY:** Do not reuse or refill this container. Place in trash or offer for recycling, if available. **IF PARTLY FILLED:** Call your local solid waste agency or 1-800-CLEANUP for disposal instructions. Never place unused product down any indoor or outdoor drain.
