UNITED STATES ENVIRONMENTAL PROTECTION AGENCY
WASHINGTON, DC 20460

SEP 3 2013

OFFICE OF CHEMICAL SAFETY
AND POLLUTION PREVENTION

Ms. Erin M. Tesch, Vice President
"TSG": Technology Sciences Group
1150 18th Street, NW; Suite 1000
Washington, DC 20036

Subject: FQPA Code 302 Label Amendment
PuR Purifier Of Water
EPA Registration Number: 3573-90
Application Date: January 19, 2013
EPA Receipt Date: September 3, 2013

Dear Ms. Tesch:

The following amendment, submitted in connection with registration under section of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) 3 (c) 5, as amended, is acceptable.

Amendment Purpose:

"This is a fast track Amendment to EPA Registration No. 3573-90 to add language for alternate Directions For Use."

On Pages Five And Six:

Inserted: "Alternate Directions/Instructions for Use with DayOne Waterbag Directions/Instructions For Use: It is a violation of Federal law to use this product in a manner inconsistent with its labeling. 1. FILL: Fill the [DayOne] Waterbag to the "fill-line" with [contaminated] water (2.5 gallons). Make sure that the end of the outlet tube does not contact the water source during the filling process. 2. ADD: Open sachet/package/packet/pouch/pack using scissors or provided cutter and add contents of sachet/package/packet/pouch/pack to [DayOne] Waterbag/bag. 3. CLOSE: Close [DayOne] Waterbag/bag by tightly folding top down 3 times then fasten buckle. 4. MIX: Hang [DayOne] Waterbag/bag to tree, pole or other fixed/permanent/secure/stable object, or wear as a backpack. Grab handles on side of [DayOne] Waterbag/bag and agitate/mix contents of Waterbag/bag vigorously for **5 minutes** by rotating/pulling Waterbag/bag back and forth continuously. Water will become colored when powder is added and mixed. The color indicates that the product is working.

5. WAIT: Wait **25 minutes** before dispensing drinking water from outlet port/spigot in [DayOne] Waterbag/bag. Floc/sediment/particulates will settle to bottom of Waterbag/bag [below dispensing outlet port/spigot]. When the process is finished, the water will be clear. 6. DRINK: Dispense water from [DayOne] Waterbag/bag into a clean container, such as a cup or glass for drinking. Do not dispense water once water level is below dispensing outlet port/spigot. Drink water from [DayOne] Waterbag/bag within 24 hours after its preparation. Water that is not consumed may be used for cooking, washing, watering animals or otherwise discarded. Do not drink if water is colored, yellow or cloudy. This could mean that water was not mixed properly. Repeat step 4. If water remains colored/yellow, then discard water.”

“Clean [DayOne] Waterbag/bag after each use. After water is consumed, or 24 hours, whichever comes first, agitate remaining water with floc/sediment/particulates that has settled below dispensing outlet port/spigot. Open top of [DayOne] Waterbag/bag and pour floc/sediment/particulates from the Waterbag/bag. Floc/sediment/particulates may be disposed of in the latrine [toilet][utility sink], or on the ground away from children and animals. If possible, wipe the inside of the [DayOne] Waterbag/bag with a cloth to remove the remaining floc/sediment. For best results, remove floc/sediment/particulates 24 hours after initial treatment or when clean water level falls below dispensing outlet port/spigot, whichever comes first. The [DayOne] Waterbag/bag may be used repeatedly to prepare clean drinking water. ALWAYS check [DayOne] Waterbag/bag for leaks prior to adding sachet/package/packet/pouch/pack.”

General Comments:

Based on the information submitted, the following comments apply. The Label Amendment is **Acceptable**. An EPA-stamped, **Accepted** Product Label is enclosed for your Company Record. And a copy of the EPA-stamped, **Accepted** Product Label is attached in *Regulatory File Jacket 3573-90* for future reference.

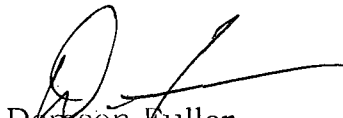

This labeling supersedes all previously accepted labeling. The next label printing of this Product must use this labeling unless subsequent changes have been approved. You must submit one (1) copy of the final printed labeling before you release the Product for shipment with the new labeling. In accordance with 40 CFR 152.130(c), you may distribute or sell this Product under the previously approved labeling for 18 months from the date of this Letter. After 18 months, you may only distribute or sell this Product if

3/18

it bears this new revised labeling or subsequently approved labeling. "To distribute or sell" is defined under FIFRA section 2(gg) and it implementing regulation 40 CFR 152.3.

If you have questions or comments with regard to this Agency Letter, please contact Killian Swift by email at Swift.Killian@epa.gov or by telephone at 703-308-6346. When you are submitting information or data in response to this Agency Letter, please send a copy of this Agency Letter with your response in order to facilitate processing.

Sincerely yours,

Derison Fuller,
Acting EPA Product Manager 32
Regulatory Management Branch II
Antimicrobials Division 7510P

Enclosure: EPA-stamped, **Accepted** "PuR Purifier Of Water" Product Label.

Back/Side Container OR Supplemental Label

DIRECTIONS/INSTRUCTIONS FOR USE: It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

or

[If using DayOne Waterbag/bag, see insert for alternate Directions for Use.]

1. MIX:

- Open a sachet/package/packet/pouch/pack using a pair of scissors.
- Add the contents of the sachet/package/packet/pouch/pack to a clean mixing vessel/container/bucket containing/with/holding 10 liters [2.5 gallons] of water.

2. STIR:

- Agitate/stir/mix the powder vigorously in the water for 5 minutes. Be sure a vortex/funnel/whirlpool is created when mixing/stirring. Then, let the water stand for 5 minutes until it clarifies/becomes clear.
- After adding the powder to the water, the water will become colored./The water will become colored when the powder is added. The color indicates that the product is working. When the process is finished, the water will be clear.

3. FILTER:

[Note: Bold, italicized text is for reader clarity only. Bracketed [] text denotes optional text. Backslash \ and forward / denotes alternate text.]

6/18

- If you see the water is still colored, you can mix/stir/agitate again and let it rest for another few minutes.
- Once the water looks clear, and the floc/sediment/particulates is/are at the bottom of the vessel/container/bucket, filter the water through a clean cloth filter into a clean storage vessel/container/bucket and cover it with a lid.
- The filter must be a clean, thick 100% cotton cloth, without holes, that prevents the floc/sediment/particulates from passing through. Carefully pour the clear water through the cloth into a bucket/vessel/container. The floc/sediment/particulates will be left behind in the bottom of the bucket/vessel/container and in the cloth filter.
- Discard the floc/sediment/particulates from the water treatment process in the latrine [toilet] [utility sink], or on the ground away from children and animals. [Rinse and wash the cloth thoroughly before reusing.]

4. BEFORE DRINKING:

- Wait **20 minutes** before drinking the water.
- Do not drink water if it is colored or cloudy after treatment. If the floc/sediment/particulates accidentally get[s] into the treated water, use another cloth to filter the floc/sediment/particulates out of the treated water. The water is still good to drink.
- Drink treated water within 24 hours after its preparation. Water that is not consumed should/may be used for cooking, washing, watering animals or otherwise discarded.
- **ALWAYS** dispense the water from the storage container into another container, such as a cup or glass for drinking.

PRECAUTIONARY STATEMENTS: Hazards to humans and domestic animals.

WARNING: [Dry product] Causes substantial but temporary eye injury. Harmful if absorbed through skin or if swallowed. Avoid contact with skin or clothing. Do not get in eyes. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, or using tobacco. Remove and wash contaminated clothing before reuse. Contains iron sulphate (352 mg ferric iron).

FIRST AID:

If in eyes:

- Hold eye open and rinse slowly and gently with water for 15 – 20 minutes.
- Remove contact lenses, if present, after the first 5 minutes, then continue rinsing.
- Call poison control center or doctor for treatment advice.

If on skin:

- Take off contaminated clothing.
- Rinse skin immediately with plenty of water for 15 – 20 minutes.
- Call poison control center or doctor for treatment advice.

If swallowed:

- Call a poison control center or doctor immediately for treatment advice.
- Have person sip a glass of water if able to swallow.
- Do not induce vomiting unless told to by a poison control center or doctor.
- Do not give anything to an unconscious person.

Have the product container or label with you when consulting a poison control center or doctor, or going for treatment. In North America you may also contact 1-866-461-4403 for emergency medical treatment information.

STORAGE/DISPOSAL: Store away from heat, humidity and sunlight. Dispose of empty container in trash/appropriately. Dispose of floc/sediment/particulates in latrine [toilet] [utility sink] or on the ground away from humans and animals.

[Note: Bold, italicized text is for reader clarity only. Bracketed [] text denotes optional text. Backslash \ and forward / denotes alternate text.]

Alternate Directions/Instructions for Use with DayOne Waterbag

DIRECTIONS/INSTRUCTIONS FOR USE: It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

1. FILL:

- Fill the [DayOne] Waterbag/bag to the "fill-line" with [contaminated] water (2.5 gallons). Make sure that the end of the outlet tube does not contact the water source during the filling process.

2. ADD:

- Open sachet/package/packet/pouch/pack using scissors or provided cutter and add contents of sachet/package/packet/pouch/pack to [DayOne] Waterbag/bag.

3. CLOSE:

- Close [DayOne] Waterbag/bag by tightly folding top down 3 times then fasten buckle.

[Note: Bold, italicized text is for reader clarity only. Bracketed [] text denotes optional text. Backslash \ and forward / denotes alternate text.]

9/18

4. **MIX:**

- Hang [DayOne] Waterbag/bag to tree, pole or other fixed/permanent/secure/stable object, or wear as a backpack
- Grab handles on side of [DayOne] Waterbag/bag and agitate/mix contents of Waterbag/bag vigorously for **5 minutes** by rotating/pulling Waterbag/bag back and forth continuously.
- Water will become colored when the powder is added and mixed. The color indicates that the product is working.

5. **WAIT:**

- Wait **25 minutes** before dispensing drinking water from outlet port/spigot in [DayOne] Waterbag/bag. Floc/sediment/ particulates will settle to bottom of Waterbag/bag [below dispensing outlet port/spigot]. When the process is finished, the water will be clear.

6. **DRINK:**

- Dispense water from [DayOne] Waterbag/bag into a clean container, such as a cup or glass for drinking. Do not dispense water once water level is below dispensing outlet port/spigot.
- Drink treated water from [DayOne] Waterbag/bag within 24 hours after its preparation. Water that is not consumed may be used for cooking, washing, watering animals or otherwise discarded.
- Do not drink if water is colored, yellow or cloudy. This could mean that water was not mixed properly. Repeat step 4. If water remains colored/yellow, then discard water.

Clean [DayOne] Waterbag/bag after each use. After water is consumed, or 24 hours, whichever comes first, agitate remaining water with floc/sediment/particulates that has settled below dispensing outlet port/spigot. Open top of [DayOne] Waterbag/bag and pour floc/sediment/particulates from the Waterbag/bag. Floc/sediment/particulates may be disposed of in the latrine [toilet][utility sink], or on the ground away from children and animals. If possible, wipe the inside of the [DayOne] Waterbag/bag with a cloth to remove any remaining floc/sediment. For best results, remove floc/sediment/particulates 24 hours after initial treatment or when clean water level falls below dispensing outlet port/spigot, whichever comes first.

The [DayOne] Waterbag/bag may be used repeatedly to prepare clean drinking water. ALWAYS check [DayOne] Waterbag/bag for leaks prior to adding sachet/package/packet/pouch/pack.
