Note: Changes in labeling differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Antimicrobials Division prior to use of the label in commerce. In any correspondence on this product always refer to the above EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby registered under the Federal Insecticide, Fungicide and Rodenticide Act.

Registration is in no way to be construed as an endorsement or recommendation of this product by the Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

This product is conditionally registered in accordance with FIFRA section 3(c)(7)(A). You must comply with the following conditions:

1. Submit and/or cite all data required for registration/reregistration/registration review of your product under FIFRA when the Agency requires all registrants of similar products to submit such data.

2. You are required to comply with the data requirements described in the DCI Order identified below:

a. DDAC GDCI-069149-0681, GDCI-069149-30869

You must comply with all of the data requirements within the established deadlines. If you have questions about the Generic DCI listed above, you may contact the Reevaluation Team Leader (Team 36): <http://www2.epa.gov/pesticide-contacts/contacts-office-pesticide-programs-antimicrobial-division>

3. Make the following label changes before you release the product for shipment:

- Revise the EPA Registration Number to read, “EPA Reg. No. 3573-103.”

4. Submit one copy of the final printed label for the record before you release the product for shipment.

Should you wish to add/retain a reference to the company’s website on your label, then please be aware that the website becomes labeling under the Federal Insecticide Fungicide and Rodenticide Act and is subject to review by the Agency. If the website is false or misleading, the product would be misbranded and unlawful to sell or distribute under FIFRA section 12(a)(1)(E). 40 CFR 156.10(a)(5) list examples of statements EPA may consider false or misleading. In addition, regardless of whether a website is referenced on your product’s label, claims made on the website may not substantially differ from those claims approved through the registration process. Therefore, should the Agency find or if it is brought to our attention that a website contains false or misleading statements or claims substantially differing from the EPA approved registration, the website will be referred to the EPA’s Office of Enforcement and Compliance.

If you fail to satisfy these data requirements, EPA will consider appropriate regulatory action including, among other things, cancellation under FIFRA section 6(e). Your release for shipment of the product constitutes acceptance of these conditions. A stamped copy of the label is enclosed for your records. Please also note that the record for this product currently contains the following CSFs:

- Basic CSF dated 04/10/2020
- Alternate CSF #s 1-11 dated 04/10/20/20

(Fabric Applications)

To refresh (deodorize) fabrics, spray on fabrics until slightly damp to eliminate odors. (For a noticeably fresh home, spray fabrics (and carpets) all around your home.)

To sanitize soft surfaces (fabrics), clean heavily soiled areas before application. From a distance of 6-8 inches, spray a spot (2" x 2" area) evenly until damp to kill bacteria. Fabric must remain wet for 5 minutes. [Effective against Enterobacter aerogenes and Staphylococcus aureus.] (Effective against E. aerogenes and S. aureus.)

To kill (control)(eliminate) odor-causing bacteria on soft surfaces(fabrics): Clean heavily soiled areas before application. From a distance of 6-8 inches, spray evenly until damp to kill bacteria. Fabric must remain wet for 5 minutes. (As item dries, odors are eliminated, and bacteria are killed.) [Effective against Enterobacter aerogenes and Staphylococcus aureus.] (Effective against E. aerogenes, and S. aureus.)

For mold/mildew prevention (control)(inhibition): For heavily soiled areas, a pre-cleaning step is required. From a distance of 6-8 inches, spray surface until thoroughly wet. Fabric must remain wet for 5 minutes. Repeat treatment every 14 days, or more often if new growth appears. [Effective against Aspergillus niger and Penicillium variabile]. (Effective against A. niger and P. variabile.)

(Hard Non-Porous Surfaces)

For Cleaning (deodorizing): Spray 6-8 inches from surface. Wipe dry with a dry paper towel or lint free cloth.

For Sanitization and [Bactericidal & Virucidal†] Disinfection: For heavily soiled areas only, a pre-cleaning step is required. For hard non-porous surfaces, spray surface from 6-8 inches until thoroughly wet. Let stand for 5 minutes before wiping. . [Effective as disinfectant against Proteus mirabilis, Escherichia coli, Staphylococcus aureus, and Influenza A†. Effective as sanitizer against Enterobacter aerogenes and Staphylococcus aureus]. (Effective as disinfectant against E. aerogenes, P. mirabilis, E. coli, S. aureus, and Influenza A†. Effective as sanitizer against E.aerogenes and S. aureus).
