**B & G**  
**Ban-buG**  
**RESIN STRIP**  
CONTROLS: FLIES, MOSQUITOES, GNATS,  
AND OTHER SMALL FLYING INSECTS

**RESIN STRIP**

USE FOR

SEP 13

THE FEDERAL  
DEPARTMENT  
OF AGRICULTURE  
WASHINGTON, D.C.  
20250

**B & G**

**Ban-buG**  
**RESIN STRIP**

**CONTROLS:** flies, mosquitoes, gnats, moths,  
and other small flying insects.

**USE:** In homes, motel rooms, and animal  
shelters.

**DIRECTIONS FOR USE**

To control flies, gnats, mosquitoes and other small flying  
insects, suspend one Ban-buG strip per average size room  
(10 x 10 x 10 feet) or per 100 square feet of floor area. Re-  
place strip if effectiveness diminishes, usually after four  
months.

To control flies in garbage cans cut and attach one strip in-  
side the lid of an average-sized garbage can (20 gallon capacity.)  
This will be effective for an entire fly season. Keep lid on garbage  
can.

**Animal Buildings**

To control flies mosquitoes and gnats in Horse barns, Calf  
barns, Stables, Pig pens, Poultry houses, Dog Kennels and  
other farm buildings, suspend one strip per 100 square feet  
of floor space. In larger areas additional strips should be  
equally distributed over area to be treated. Weather and other  
conditions such as extreme ventilation may alter the per-  
formance, but this treatment is normally effective for up to  
four months. Replace strips if effectiveness diminishes.

**Catch Basins**

To control mosquitoes breeding in catch basins suspend one  
strip approximately 10 inches above water line in each basin.  
Strip should be replaced when effectiveness diminishes, usually  
after ten to fifteen weeks.

**CAUTION!**

**KEEP OUT OF REACH OF CHILDREN**

Do not get in mouth, harmful if swallowed. After pro-  
longed storage, a small amount of liquid may form on  
the strip. Do not get liquid in eyes. Wash hands  
thoroughly with soap and water after handling strip.  
Do not use in nurseries or rooms where infants, ill or  
aged persons are confined. Do not contaminate feed,  
water and foodstuffs.  
Do not use in kitchens, restaurants, or areas where  
food is prepared or served.

**RESIN STRIP**

**USE FOR**

Equally distributed over area to be treated under conditions such as extreme ventilation, but this treatment is normal for four months. Replace strips if effective.

**Catch Basin**

To control mosquitoes breeding in a catch basin, place a resin strip approximately 10 inches above the water level. Strip should be replaced when effective after ten to fifteen weeks.

**CAUTIC**

**KEEP OUT OF REACH OF CHILDREN**

Do not get in mouth, harmful if swallowed. For long storage, a small amount of the strip. Do not get liquid in eyes, wash thoroughly with soap and water. Do not use in nurseries or rooms where young children or aged persons are confined. Do not use near water and foodstuffs. Do not use in kitchens, restaurants, or where food is prepared or served.
