DIRECTIONS

For most effective result, and not exposed or accessible stages of the stored food pests, use in a room or area treated to heavy fine mist. Treat infested area, then lights out, and when possible, keep doors closed for 10 minutes after spraying.

Flying Insects. For control of flies, mosquitoes, gnats, boxelder bugs, wasps, hornets, and many other flying pests, direct the spray toward the upper portions of the room and saturate the atmosphere with the mist using 2 to 3 ounces to each 1000 cubic feet of space.

Crawling Insects. To control roaches, silverfish, crickets, spiders, scorpions and other mites, spray infested areas thoroughly and direct the liquid behind baseboards, moldings, cabinets, shelves, sinks, door and window frames, and pipes, toward drains and dark corners, and into cracks, crevices, recesses, and similar hiding places.

Against ant infestations, treat shelves, cabinets and storage areas, spray ant runs, trails, baseboards, thresholds, and other places of entry and treat nests liberally.

In controlling fleas and ticks, direct the application toward lower wall portions, baseboards, rugs, carpets, and floors of infested areas. Animal quarters, kennels, and bedding should also be sprayed.

To effectively control bedbugs, apply liberally to top, ends, sides, and bottom of mattresses, spraying thoroughly all tufts, seams and folds. Spray springs and frame, directing the liquid into all cracks and lock joints. Treat walls, baseboards, moldings, floors, closets and bedroom furniture, with particular attention to protected bedbug hiding and breeding places.

For most effective control of clothes moths and carpet beetles, remove infested articles from storage, crush thoroughly and, if possible, air several hours in direct sunlight. Apply spray liberally to all surfaces of empty chests, closets, bureaus and storages, directing the liquid into cracks, joints and crevices. After airing, infested articles may be treated by holding the spray nozzle at least 3 feet away from the fabric and applying the liquid lightly to avoid the possibility of staining. Treat both sides of rugs, carpets, and pads, and all exposed and accessible surfaces of overstuffed furniture. Repeat treatment in 30 days for susceptible articles not stored in moth-tight containers.

Home and institutional pantries and food storages frequently become infested with various stored food pests, including flour beetles, weevils, caddis, grain beetles, meal worms, spider beetles, meal moths, puppers, grain and cheese mites. To avoid sources of reinfestation, wormy flour, grain and cereals should be destroyed before treatment. Spray thoroughly all surfaces of shelves, bins, cupboards, cabinets, pantries, lockers, and similar storages, with particular attention to cracks, niches, crevices, and other hiding places.

Industrial Caffe Insecticide Spray is an excellent insecticide for use as a vapor, fog or mist spray in special generators. Regulate dosage in accordance with equipment manufacturers' directions for the particular type of applicator employed. Application should be sufficient to thoroughly fill the enclosure with the fog, mist, or vapor.

Food Processing Plants: Foods should be covered during treatment. All food processing surfaces should be covered during treatment or thoroughly cleaned before use. When using the product as a space spray in these areas, apply only when plant is not in operation.

INDUSTRIAL CAFE INSECTICIDE SPRAY

An effective, fast acting insecticide for the control of roaches and many other injurious and annoying insects found in homes, institutions, and buildings. It can be used around food, food products and utensils but should not be applied directly to food or foodstuffs. This spray is highly useful for insect control in residences, institutions, public buildings, hospitals, hotels, clubs, restaurants, stores, markets, and theaters.

Active Ingredients	100%
Piperonyl utoxide technical**	0.625%
Pyrethrins	0.120%
Petroleum Oil	99.255%

**Equivalent to 0.500% of (butylcarbityl) (6-propylpiperonyl) ether, and to 0.125% of related compounds.

WARNING: KEEP OUT OF REACH OF CHILDREN.

May be fatal if swallowed. May be absorbed through skin. Wash thoroughly after handling. Avoid contamination of food or foodstuffs. Do not spray near or toward open flame. Do not use on pets or animals. Do not use in nurseries or rooms where infants, ill, or aged persons are confined.
