

ALGAE GUARD

1 Gallon

EPA Reg. No. 3618-25

ALGAE GUARD is used to control algae, bacteria, and fungi in recirculating commercial and industrial water cooling towers. Prior to its use, systems must be cleaned to remove algae growth, microbiological slime and other deposits. An initial slug addition to 4.0 to 10.0 fluid ounces of **ALGAE GUARD** per 1000 gallons of water to provide a concentration of 32 to 80 parts per million of **ALGAE GUARD** based on the total weight of water in the system is recommended. Repeat initial dosage until control is evident. Subsequent slug additions of 1.0 to 10.0 fluid ounces of **ALGAE GUARD** per 1000 gallons of water (8 to 80 parts per million of **ALGAE GUARD**) should be employed every 2 to 5 days or as needed. **ALGAE GUARD** addition depends upon the relative amount of bleedoff and the severity of the microbiological problem. Slug additions should be made in the same amount of water as the bleedoff.

COMPOSITION	Percent by weight
Active ingredient	15.0 percent
Propylene glycol, ethylene glycol, dimethylamine, ethylene glycol, dimethylamine, ethylene glycol, dimethylamine	15.0 percent
Inert ingredient	85.0 percent
Weight per gallon	8.50 pounds
Weight of active ingredient per gallon	1.29 pounds

CAUTION

Hazardous if swallowed. Avoid contact with skin and eyes. In case of contact, flush with plenty of water for at least 15 minutes. If irritation persists, get medical attention. Do not use for drinking water. Do not use for irrigation of crops. Do not use for watering lawns. Do not use for watering plants. Do not use for watering trees. Do not use for watering shrubs. Do not use for watering flowers. Do not use for watering vegetables. Do not use for watering fruits. Do not use for watering ornamentals. Do not use for watering lawns. Do not use for watering plants. Do not use for watering trees. Do not use for watering shrubs. Do not use for watering flowers. Do not use for watering vegetables. Do not use for watering fruits. Do not use for watering ornamentals.
