

# NOVA-RON

FORMULATED ESPECIALLY FOR BAKERIES AND  
FOOD PROCESSING PLANTS.  
RESIDUAL IN ACTION. READY TO USE.  
CONTAINS KORLAN<sup>†</sup>  
KILLS EXPOSED STAGES OF ROACHES AND FLIES.

### ACTIVE INGREDIENTS:

Ronnel* [0,0-dimethyl-0-(2,4,5 trichlorophenyl)- phosphorothioate]*	2.000%
Pyrethrins	0.025%
Technical Piperonyl Butoxide**	0.063%
Aromatic Petroleum Derivative Solvent	2.310%
Petroleum Distillate	95.172%

INERT INGREDIENTS ----- 0.430%

\*Korlan is registered tradename for ronnel, Dow Chemical Company. U.S. Pat. 2,599,516.

\*\*Equivalent to 0.05% (butyl carbetyl) (6-propyl piperonyl) ether and 0.13% of related compounds.

**CAUTION.** Keep Out of the Reach of Children.

See additional cautions below.

USDA Reg. No. 3624-82

### DIRECTIONS

**BAKERIES AND FOOD PROCESSING PLANTS.**  
Nova-Ron is a ready to use oil base insecticide especially formulated for use in bakeries and food processing plants. It is especially compounded for control of resistant roaches and flies.

**APPLICATION - COCKROACHES IN BUILDINGS:**  
For bakeries and food processing plants apply Nova-Ron as a coarse wet spray. DO NOT FOG. Apply 1 gallon to 350 to 1,000 square feet of surface, depending upon the absorbent properties of the surface. Spray surfaces such as inside walls, partitions and ceilings of buildings until the surfaces are wet but the spray is not running in streams. Apply Nova-Ron as a spot treatment under and behind processing machinery and similar areas where insects are seen running, congregating or hiding, paying particular attention to cracks, crevices and hidden areas where insects may breed.

Avoid deposits on areas frequently contacted by children. Do not contaminate food, food containers or cooking utensils.

**FLY CONTROL - BUILDINGS:**  
Apply Nova-Ron as a medium to coarse spray until the surfaces are wet but not running. Apply to doorways, around windows, ceilings, loading docks and similar areas where flies feed and rest. Under normal conditions of climate a single treatment will give control for 4 to 6 weeks.

**FOR REFUSE AREAS:**  
Use Nova-Ron, enough to soak the surfaces, or areas such as manure piles, garbage dumps and similar breeding locations. Maintenance of good sanitary conditions will add greatly to the success of fly control programs.

### CAUTION

Harmful if swallowed.  
Irritating to the skin and eyes.  
Do not get in eyes.  
Avoid prolonged or repeated contact with the skin.  
Avoid breathing spray mist.  
Wash thoroughly with soap and water after handling.  
Avoid contamination of food, foodstuffs and water supplies.  
Keep away from flames and heat.  
Cover food receptacles and utensils while spraying.  
Do not apply while plant is in operation.  
Do not use in milk houses or milk processing plants.

**Note to Physician:** This material is a cholinesterase inhibitor. Treat symptomatically. Atropine is indicated.
