

DIRECTIONS

APPLICATION TO GRAIN BINS: The diluted spray may be used either inside the bins or outside the bins before filling the bins with grain. It may also be used to aid in the control of insects infesting floors and walls of box cars, flour mills, feed mills and handling machinery such as conveyors and mixers.

When used according to directions this spray aids in the control of exposed stages of such grain, flour and plant cereal insects as rice and granary weevils, bran bugs, flour beetles, cadelle, Indian Meal moth, black carpet beetle, flies, meal worms and scavenger beetles. This product will not control the khapra beetle.

DIRECTIONS

BEFORE SPRAYING – clean thoroughly the surfaces to be sprayed. Sweep and remove as completely as possible all accumulated grain residues, dust and other forms of dirt from bin walls and floors. Pay special attention to corners and hard-to-get-at places where insects may breed.

APPLICATION: Apply this spray as a coarse wet spray to the surfaces to be treated at the rate of 1 gallon to 750 square feet of surface. If walls and floors are sprayed just to the point where the spray begins to run off, the correct dosage will be applied. Naturally the amount required for this will depend somewhat on the character of the surface being sprayed. Do not spray directly on grains, food, or feedstuffs or on sacks containing these products.

CAUTION

Harmful if Swallowed

This product is toxic to fish. Do not contaminate water by cleaning of equipment, or disposal of wastes. Do not reuse empty container. Return to drum reconditioner or destroy by perforating or crushing and burying in a safe place.

FLASH POINT 140° DO NOT USE, POUR, SPILL OR STORE NEAR HEAT OR OPEN FLAME.
