

GRAIN

ELEVATOR

DRY

CONCENTRATED

1971

DIRECTIONS

DILUTION: Add 1 gallon of this concentrate to 7 gallons of water with good stirring. Emulsify only enough material for one application and use the emulsion as soon as possible.

APPLICATION TO GRAIN BINS: The diluted spray may be used either inside the bins or outside the bins, either before or after filling the bins with grain. It may also be used to aid in the control of insects infesting floors and walls of box cars, flour mills, feed mills and handling machinery such as conveyors and mixers.

When used according to directions this spray aids in the control of exposed stages of such grain, flour and plant cereal insects as rice and granary weevils, bran bugs, flour beetles, cadelle, Indian meal moth, black carpet beetles, flies and meal worms.

BEFORE SPRAYING clean thoroughly the surfaces to be sprayed. Sweep and remove as completely as possible all accumulated grain residues, dust and other forms of dirt from bin walls and floors. Pay especial attention to corners and hard-to-get-at places where insects may breed.

APPLY this spray as a coarse wet spray at the rate of 1 gallon to 750 square feet of surface or to the point of "just-about-to-run-off".

GRAIN & ELEVATOR SPRAY CONCENTRATE

DIRECTIONS

APPLICATION TO GRAIN SURFACES: **APPLY** the spray as a coarse wet spray to the surface of grain at the rate of 1 gallon to 750 square feet of top surface. At the same time spray the surface of the bin above the grain. If the grain is already infested with Indian Meal Moth, rake the surface after spraying and spray the surface again. The raking should be to a depth of about 4 inches.

This concentrate may be used in appropriate fogging equipment without diluting and applied to grain surfaces at the rate of one gallon to 6000 square feet of surface.

REMOVAL OF GRAIN FROM BIN: After applying this spray to the surface of grain the top surface of the grain must be thoroughly mixed with the rest of the bin contents before loading out. Spraying of the top surface is not recommended for box cars or small grain masses. To use this spray on box cars of grain or small grain storages may result in using more than the legal tolerance of 2 ppm. of the toxicant.

WARNING: Keep out of the reach of children. Harmful if swallowed. Avoid prolonged or repeated breathing of vapor. Avoid prolonged or repeated contact with the skin.

DO NOT FREEZE. Store in warm building.
