

[3624-149]

IMPORTANT: Read this section first.

DILUTION: To prepare the concentrated product, mix one part concentrate with 6 parts fuel or oil. For the **best** results, it is recommended that only the amount of diluted product required per application be mixed. **AGITATE THOROUGHLY BEFORE USING.** **AFTER DILUTION, FOLLOW THESE DIRECTIONS** for control of flying insects, either inside or outside: *Drosophila*, Gnats (Vinegar and Fruit flies), Houseflies, Blowflies, Anagoumois Grain Moths, Mediterranean Flour Moths, Indian Meal Moths, and for such crawling insects as Cockroaches, Confused Flour Beetles, Ants, Caddisflies, Silverfish, Carpet Beetles that would be exposed at the time of application.

RECOMMENDATIONS: Most effective inside fogging of food processing plants and insides of structures normally found on parks, golf courses, and outdoor theatres, is accomplished during dry weather. External openings to building should be closed with exception of probably one providing an updraft. All parts of building or enclosure should receive equal concentration of fog. Exposed foods should be guarded by proper protective covering or by temporary relocation. Plan fogging operation so that operator may continually move away from fog. Fogging should be done from windward side when applying fog on outside of building.

NOTICE: The manufacturer warrants that this product conforms to its chemical description and is reasonably fit for the purpose stated on the label when used in accordance with directions under normal conditions of use, but neither this warranty nor any other warranty of merchantability or fitness for a particular purpose, express or implied, extends to the use of this product contrary to the label instructions, or under abnormal conditions, or under conditions not reasonably foreseeable to seller, and buyer assumes the risk of any such use.

NET CONTENTS

1.5 GALLONS

NOVA 1-6 Fogging Concentrate

**FOR USE IN THERMAL-TYPE GENERATORS
SUCH AS THE DYNA FOG MACHINE FOR
CONTROL OF CERTAIN CRAWLING AND
FLYING INSECTS**

Active Ingredients	100%
Petroleum Distillate	97.75%
Technical Piperonyl Butoxide*	1.50%
Pyrethrins	.75%
*Equivalent to 1.2% thuylicattizer (6-pyryloperonyl ether) and .3% related compounds	

CAUTION

KEEP OUT OF THE REACH OF CHILDREN

See additional cautions on side panels.

NOVA PRODUCTS, INC.

Kansas City, Kansas 66119

DIRECTIONS: For control of flying insects, either inside or outside: parks, golf courses, outdoor theatres, and the immediate adjacent areas of structures normally found on the above areas and around food processing plant buildings should be completely covered with visible fog, or at the rate of about 2 1/2 pints per acre. The same is true of indoor treatment, although in the latter case not more than 1 gallon per 50,000 cubic feet should be applied, and the particle size of the insecticide should be 2 to 10 microns. Machine is adjustable for these sizes. Do not remain in treated areas. Ventilate the area after treatment is completed. Repeat application should be affected as often as is necessary.

Spray 1-6 Fogging Concentrate upward at walls and ceilings so that as many insects as possible can be contacted with direct mist. After spraying, sweep up all dead and dying insects and destroy them. Periodic spraying assists in control of new hatches of named insects, thereby reducing infestation.

CAUTION: Harmful if swallowed. Do not contaminate or store near feed or foodstuff. Foods should be removed or covered during treatment. All food products and surfaces should be covered during treatment or thoroughly cleaned before using. When using the product in these areas, apply only when the facility is not in operation. Do not reuse containers. Destroy when empty. This product is not intended for household use.

This product is toxic to fish. Keep out of lakes, streams or ponds. Do not contaminate water by cleaning of equipment or disposal of wastes.

CAUTION: Remove pet, food and feed from area before spraying.

A complete technical manual for the use of this product is available. **THIS FORMULA MUST BE USED BY TRAINED OPERATORS ONLY.**
