| Active Ingredients | 100% |
| Petroleum Distillate | 97.75% |
| Technical Piperonyl Butoxide* | 1.50% |
| Pyrethrins | 0.75% |

*Equivalent to 1.2% (butylcarbityl) (6-propylpiperonyl) ether and .3% related compounds.

For control of flying insects, either inside or outside - Drosophila Gnats (Vinegar and Fruit flies), Houseflies, Blowflies, Anagournois Grain Moths, Mediterranean Flour Moths, Indian Meal Moths; and for such crawling insects as Cockroaches, Confused Flour Beetles, Ants, Cadelles, Silverfish, Carpet Beetles that would be exposed at the time of application.

RECOMMENDATIONS: Most effective inside fogging of food processing plants and insides of structures normally found on parks, golf courses, and outdoor theatres, is accomplished during dry weather. External openings to building should be closed with exception of probably one providing an updraft. All parts of building or enclosure should receive equal concentration of fog. Exposed foods should be guarded by proper protective covering or by temporary relocation. Plan fogging operation so that operator may continually move away from fog. Fogging should be done from windward side when applying fog on outside of building.

NOTICE: The manufacturer warrants that this product conforms to its chemical description and is reasonably fit for the purpose stated on the label when used in accordance with directions under normal conditions of use, but neither this warranty nor any other warranty of merchantability or fitness for a particular purpose, express or implied, extends to the use of this product contrary to the label instructions, or under abnormal conditions, or under conditions not reasonably foreseeable to the manufacturer, or to assume the risk of any such use.

U.S. DEPARTMENT OF AGRICULTURE
WASHINGTON, D.C.

On a CHL 5000, use 100 to 150 g of insecticide per 1000 cubic feet of space, with enough water to give a fine spray. Do not spray adjacent areas of structures partially free of infestation, to give areas and around food processing plant, but they should be completely covered with visible fog, or a fine mist of about 2½ mils per inch. The same is true of other treatments, although in the latter case not more than 1 lb of insecticide per 50,000 cubic feet should be applied, and the particle size of the insecticide should be 1½ to 10 microns. Flow rate is adjustable for these sizes. Do not remain in treated areas. Ventilate the area after treatment is completed. Repeat application should be effected as often as is necessary.

Spray : Fogging Concentrate up walls and ceilings so that as many insects as possible can be contacted with direct mist. After spraying, sweep up all dead and dying insects and destroy them. Periodic spraying assists in control of new batches of naïve insects, thereby reducing infestation.

CAUTION: Harmful if swallowed. Do not store near food or foodstuff. Foods should be covered during treatment. All food should be covered during treatment or before using. When using the product in only when the facility is not in operation. Destroy when empty. This product is not intended for household use.

This product is toxic to fish. Keep out of streams or ponds. Do not contaminate water by cleaning of equipment or disposal of wastes.

CAUTION: Keep away from pets, birds and children. Keep out of eyes. Before spraying.
