

Bryte-Foam

Rug & Upholstery Cleaner • Concentrated • Sanitizer

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

STORAGE AND DISPOSAL

DO NOT CONTAMINATE WATER, FOOD OR FEED BY STORAGE OR DISPOSAL. OPEN DUMPING IS PROHIBITED. DO NOT REUSE EMPTY CONTAINER. DO NOT USE, POUR, SPILL OR STORE NEAR HEAT OR OPEN FLAME.

PESTICIDE DISPOSAL: Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

CONTAINER DISPOSAL: Triple rinse (or equivalent). Then allow to dry for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or incineration, or, if allowed by state and local authorities, by burning. If burned, stay out of smoke.

CARPETS, HOSPITAL AND INSTITUTIONAL: The material to be cleaned should be tested for colorfastness.

First, vacuum carpet to remove loose soils. Then remove grease and oil spots. Other stains should also be removed with a suitable spotting compound. To clean and sanitize carpets, prepare a solution of 1 part OXFORD BRYTE-FOAM to 20 parts of warm water (1 quart of OXFORD BRYTE-FOAM to 5 gallons of water) or 1 part OXFORD BRYTE-FOAM to 16 parts water if carpet is heavily soiled (8 ounces OXFORD BRYTE-FOAM to 1 gallon of water). Place solution in reservoir tank of carpet shampooing machine. Use 1 to 1 1/2 gallons of diluted cleaner for each 120 sq. ft. of carpet to be cleaned and sanitized. Adjust stopcock on tube leading from reservoir tank into brush head of machine so that a sufficient amount of solution will be deposited on the rug which will produce a copious dry foam as the brush of the machine travels over the moistened surface of the

carpet. Guide the machine over the carpet using a circular motion (left to right and then right to left with a slight overlap) working the solution into the fibers of carpet all the way across the carpet. After scrubbing, pick up excess moisture and residues with a wet and dry vacuum machine. Brush in one direction for proper drying and elimination of shading. NOTE: when using a fibre brush, wet with water to soften before using.

Pre-soak is not required when the proper nylon brush is used. Replace furniture, and equipment when carpet is dry. If carpet is not completely dry when furniture and equipment are replaced, place wax paper or aluminum foil under legs to avoid indentations and rust marks on carpet.

CARPETS, NON-HOSPITAL USE: For new type upright Dry Foam carpet shampooing machine, dilute one part OXFORD BRYTE-FOAM to 8 parts of water. Use method and procedures as described in manufacturers manual for this type of carpet shampoo machine.

Upholstery: Pretest material for colorfastness. If a special hand shampooing machine is used for cleaning and sanitizing upholstery, follow same general directions as under Carpets. To clean and sanitize upholstery by hand, first prepare a solution of 1 part OXFORD BRYTE-FOAM to 12 parts warm water (10-2/3 ounces OXFORD BRYTE-FOAM per gallon of water). Agitate solution vigorously to obtain heavy suds. Then saturate a sponge with the suds and clean the fabric thoroughly. Only use suds — do not wet fabric.
