

Highly Concentrated for Industrial and Institutional Use and for Food Processing Plants

A-KILL AEROSOL INSECT BOMB: Controls flies, mosquitoes, moths, wasps, hornets, gnats and certain other common household insects. Non-flammable, no unpleasant odor. Spray can (when used as directed). Contents of the can will completely treat 150,000 cubic feet (150' foot x 10' x 10' x 10') for the time of spray.

HOW TO USE: 1. Remove cap. 2. Point the nozzle on the side of the valve away from you. 3. Press top of valve to release the desired amount of insecticide. 4. Hold can at least 4 feet away from any object when spraying.

DIRECTIONS: FLIES, MOSQUITOES, FLYING MOTHS, WASPS, HORNETS, GNATS AND CERTAIN OTHER FLYING INSECTS: Release spray upward and in all directions into air of closed room, about 4 to 6 seconds for every 1,000 cubic feet. After 15 minutes, doors and windows may be opened. To control wasps and hornets in nests, spray nests directly at night. Do not remain in treated areas after treatment is completed.

USE IN FOOD PROCESSING PLANTS: Food could be removed or covered during treatment. All food processing surfaces should be covered during treatment or thoroughly cleaned before using. When using the product as a space spray in these areas, apply only when plant is not in operation.

OUTDOOR USE ON FLYING INSECTS: Spray into the air about 4 feet above ground, in immediate areas to be occupied. Hold can about 4 feet away from insect-infested area being sprayed. Sprinkly spray around patio, barbecue pit, entrance to house, etc., or other outdoor areas where insects are present. Expect repeated application to be necessary to control insects in outdoor situations.

CAUTION: DANGEROUS IF SWALLOWED, INHALED OR ABSORBED THROUGH THE SKIN. An irritant to the eyes, skin and mucous membranes. Wash treated skin with soap and water. If irritation continues, seek medical advice. If accidentally swallowed, do not induce vomiting. If eyes are irritated, flush with water. If irritation continues, seek medical advice. If inhaled, move to fresh air. If irritation continues, seek medical advice. If absorbed through the skin, wash with soap and water. If irritation continues, seek medical advice.

DO NOT SPRAY DIRECTLY ON THE SKIN OR ON ANIMALS. Remove bird and pet and cover their bows and depauperate before spraying. An average size room would require 10-20 seconds of spraying. Contents are under pressure. High temperatures may cause the container to burst. Do not expose to direct sunlight, radiation, stoves, hot water, or other sources of heat. Never puncture container. Throw container in incinerator.

ANALYSIS

ACTIVE INGREDIENTS

Pyrethrins (Pyrethrum flowers)	0.04%
Related Compounds	0.04%
Isobutane	0.20%
Terpenes (Terpinolene, Terpinolene)	1.00%
Petroleum Distillates	13.10%
Propellant Agents	55.00%

CONTENTS
Aerosol insecticide containing 0.04% Pyrethrins and related compounds, 13.10% Petroleum Distillates, 55.00% Propellant Agents, 0.04% Isobutane and 0.20% Terpenes (Terpinolene, Terpinolene).

Vapona® With Pyrethrins

Kills Even Resistant Flies

STAINLESS, NO UNPLEASANT ODORS

See back side panel for required precautions.

CONTENTS: Will Treat 150,000 cubic feet of space.

NET WEIGHT: 1½ pounds
