US ENVIRONMENTAL PROTECTION AGENCY OFFICE OF PESTICIDES PROGRAMS REGISTRATION DIVISION (TS-767) WASHINGTON, DC 20460	EPA REGISTRATION NO. 3040-64	DATE OF ISSUANCE 30 JUN 1987
	TERM OF ISSUANCE	
NOTICE OF PESTICIDE: <input checked="" type="checkbox"/> REGISTRATION <input type="checkbox"/> REREGISTRATION (Under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended)	NAME OF PESTICIDE PRODUCT	
	1,1-Dichloro-2,2-bis(4-chlorophenyl)ethane	

NAME AND ADDRESS OF REGISTRANT (Include ZIP code)

Sterling Chemical Corporation
 1700 Sycamore Avenue
 P.O. Box 4210
 Tallahassee, FL 32304

NOTE: Changes in labeling formula differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above U.S. EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby Registered/Reregistered under the Federal Insecticide, Fungicide, and Rodenticide Act.

A copy of the labeling accepted in connection with this Registration/Reregistration is returned herewith.

Registration is in no way to be construed as an indorsement or approval of this product by this Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

In your response to the General Registration Matter, you advised that you had no objection to the registration of the product under the name 1,1-Dichloro-2,2-bis(4-chlorophenyl)ethane. EPA has re-registered the product listed above in accordance with FIFRA section 3(j). EPA has also received your response to the Sanitizer Label Improvement Program issued July 26, 1986 and we are pleased that your product is in compliance with the program.

Your product label has been stamped with the registration number. You must change the label within 90 days of the date of this notice. The label must be changed for a period of 1 year or 2 years, whichever is shorter, after the date of this notice. The label must also be changed to comply with the registration within 90 days of this notice if the registration or label is not in compliance with the Act.

Your product will be considered in compliance with the Act if you fail to comply with this standard and result in the Agency's issuance of a Notice of Intent to Cancel the registration under FIFRA section 3(j)(1).

DESCRIPTION OF USE

Do not violate Federal law to use this product in a manner inconsistent with the labeling.

USE: Hypo-Chlor Formula 6.40 is a disinfectant. This product degrades with age. Use a chlorine test kit and increase dosage as necessary to obtain the required level of available chlorine.

DISINFECTANT USE: All surfaces to be sanitized with Hypo-Chlor Formula 6.40 should be thoroughly cleaned. In addition, the solution should be applied immediately before using the equipment.

General Sanitation for Emergency Drinking Water - Chlorinate water supplied with .5 to .9 ppm and check for residual chlorine level with chlorine test kits acceptable to local health authorities. Add 1/2 oz. to 600 gals. of water for .5 ppm.

Swimming Pool Treatment: Add to maintain 1 ppm available chlorine concentration at all times. Refer to dilution table. Frequently test chlorine level with a commercial test kit. Adjust pH of the water to between 7.2 and 7.8.

Refrigerator Sanitation: Wipe surfaces in pool area daily with 500 ppm solution of available chlorine.

Cleaning, Federally Inspected Meat and Poultry Plants, Institutional, and Seafood Processing Plants: Use or circulate 500 ppm solution on all processing equipment for at least 5 minute exposure period after thorough cleaning. Rinse water cooling troughs in morning. Water should maintain 5 ppm solution.

Wash and Clean Plant Sanitation: General Applications - After all surfaces have been thoroughly cleaned and just before use, all equipment should be sanitized with a 500 ppm solution of Hypo-Chlor 6.40. The solution should be in contact with the surface for at least 5 minutes. DO NOT RINSE with potable water after sanitizing.

Water Processing Equipment: Just prior to using and after thorough cleaning, all tanks, screens, rollers, separators, holding tanks and pipelines should be sanitized with 500 ppm Hypo-Chlor Formula 6.40 for at least 5 minutes. Rinse wash water should contain 50 ppm available chlorine. DO NOT RINSE with potable water.
