INERT INGREDIENTS	30.0%

Consists of 0.48% (butylcarbityl) (6-propylpiperonyl)  
ether and 0.12% other related compounds

# INSECT CONTROL

EPA REG NO 3640-70

EPA EST NO 3657 W11

### DIRECTIONS

For flying insects flies, mosquitoes, small flying moths,  
wasps, hornets, gnats. Close all doors and windows,  
spray upward and in all directions into the air for five  
seconds per 1,000 cubic feet of area. After 15 minutes,  
doors and windows may be opened. Do NOT remain in  
treated areas. Ventilate the area after treatment is com-  
pleted. To control wasps and hornets in nests, spray  
nests directly at night.

For crawling insects roaches, waterbugs, silverfish,  
crickets. Spray hiding places such as baseboards  
around windows, openings around sinks, pipes, drains  
and miscellaneous storage areas. Thorough and re-  
peated treatments which contact the insect directly are  
required for effective control.

For ants. Spray hills, trails, around foundations and  
window and door openings.

Spiders and Centipedes: Spray webs and other places  
where these insects crawl.

Bedbugs: Spray baseboards, mouldings and floor area.  
Spray mattresses around seams and tufts. Spray at fre-  
quent intervals.

Fleas: Spray floor area and sleeping quarters of pets.  
Repeat spray often. (DO NOT SPRAY DIRECTLY ON  
PETS)

When using W KILL AEROSOL INSECT BOMB re-  
move pets, birds and cover fish aquariums before spray-  
ing.

### USE IN FOOD PROCESSING PLANTS:

Foods should be removed or covered during treatment.  
All food processing surfaces should be covered during  
treatment or thoroughly cleaned before using. When  
using the product in these areas, apply only when the  
facility is not in operation.
