

DIRECTIONS FOR USE

SANITERGENT MARK III is a terminal sanitizing rinse for pre-cleaned dairy utensils, food processing equipment, dishes and glasses in restaurants, taverns or other similar food establishments. All parts cleaned shall have a minimum dwell time of two minutes in the sanitizing solution. Use 3/4 ounce of SANITERGENT MARK III per gallon of water for 100 PPM* available chlorine if testing facilities are available. Never allow concentration to fall below 50 PPM*. Adjust accordingly. If no testing facilities are available use 1 1/2 ounces of product per one gallon of water for 200 PPM* available chlorine. Parts shall be thoroughly cleaned and rinsed and allowed to dry.

*PPM--Parts per million available chlorine

CONTENTS: 1 1/2 Pounds

See First Aid and other precautions on back panel

EPA Reg. No. 3640-76

EPA Est. No. 3640-WI-1

DANGER

KEEP OUT OF REACH OF CHILDREN. Corrosive causes eye damage and skin irritation. Do not get in eyes, on skin or on clothing. Protect eyes and skin when handling. Harmful if swallowed. Avoid contamination of food.

FIRST AID

In case of contact, immediately flush eyes or skin with plenty of water for at least 15 minutes. For eyes, call a physician. Remove and wash contaminated clothing before re-use. If swallowed, drink promptly a large quantity of milk, egg whites, gelatin solution or if these are not available, drink large quantities of water. Call a physician immediately.

NOTE TO PHYSICIAN

Probable mucosal damage may contraindicate the use of gastric lavage. Measures against circulatory shock, respiratory depression and convulsion may be needed. Rinse empty container thoroughly with water before discarding.
