

DIRECTIONS

Open container and pour one-half of the container into toilet bowl. Flush immediately and repeatedly until ROOT OUT is gone. Then add remainder of container and repeat procedure. This should be done when use of facilities is low.

ROOT OUT can also be used directly into septic tank drainfield. Add one container of product directly to the drainfield clean out plug or distribution box which is normally located between the septic tank and the absorption disposal field. Flush with water from hose for approximately five (5) minutes. This water will carry ROOT OUT to the point of root blockage.

Do NOT use ROOT OUT through the sink or tub drains.

STEARNS ROOT OUT

Easy to use product for destroying root growth in drain fields, septic tanks and sewer and septic lines.

CAUTION

KEEP OUT OF REACH OF CHILDREN. May be harmful if swallowed. See other precautions on back panel.

WARNING

KEEP OUT OF REACH OF CHILDREN.

Harmful if taken internally. Contact physician immediately. Do NOT re-use container. Destroy when empty.

ROOT OUT attacks and destroys only the roots of shrubs or trees that have entered the sewage pipe lines. ROOT OUT used in the pipes will NOT damage the shrubs or trees, corrode drain pipes or harm the bacterial action in septic tanks.
