368-19

MANUFACTURED BY THE DOLPHIN PAINT & CHEMICAL COMPANY TOLEDO 3, OHIO, U.S.A.

DO IT RIGHT - WITH *Dolfinite*

**1481-TX
FUNGICIDAL THINNER**

Contains fungicidal properties and is the only thinner recommended to thin the various Dolfinite Fungicidal compounds.

It will reduce these compounds to whatever consistency is desired without impairing their fungicidal properties of combating dry rot and decay due to fungus growth and moisture.

Since 1481-TX Thinner contains some of the essential oils and resin used in Dolfinite compounds, it is not recommended for paint, enamel, etc., but intended only to reduce the various Dolfinite compounds to the consistency desired.

CAUTION: CONTAINS XYLOL, PENTACHLOROPHENOL AND PETROLEUM DISTILLATE.

Keep away from heat, sparks and open flame. Avoid prolonged contact with skin and breathing of vapor. Contaminated shoes and clothing should be removed promptly and skin thoroughly washed with soap and water. Do not take internally. Use with adequate ventilation. Close container after each use.

IF ON SKIN: In case of prolonged contact, immediately wash skin with soap and warm water.

EYES: For eyes, flush with plenty of water for at least fifteen minutes and get medical attention.
