

DOSAGE: For control of bacterial and fungal slime, and algae in industrial recirculating water cooling towers or systems, as well as for microbial control of air-conditioning or refrigeration cooling towers, use 1 lb. per 1000 gallons of water in the system initially, to the sump of the cooling tower. Repeat until microbial control is apparent. Thereafter, add ½ lb. per 1000 gallons of water periodically as needed to maintain microbial control.

This product is toxic to fish and wildlife. Treated effluent should not be discharged where it will drain into lakes, streams, or ponds.

Do not reuse empty drums. Return to drum reconditioner or destroy by perforating or crushing and burying in a safe place.
