#### **DOSAGE:**

For the control of bacterial, algal and fungal slime in industrial recirculating water cooling towers.

Initial Dosage: When the system is noticeably fouled, apply 1 pint to 1 quart (40 to 80 ppm of active ingredients of Ems Algaecide 316 (Concentrate) per 1,000 gallons of water in the system. Repeat until control is acheived.

Subsequent Dosage: When microbial control is evident, add ½ pint to 1 pint (20 to 40 ppm of active ingredients of Ems Algaecide 316 (Concentrate) per 1,000 gallons of water in the system every 7 days or as needed to maintain control. Badly fouled systems must be cleaned before treatment is begun.

This product is toxic to fish and wildlife. Treated effluent should not be discharged where it will drain into lakes, streams, ponds, or public water. Do not contaminate water by cleaning of equipment, or disposal of wastes. Apply this product only as specified on this label.
