

DIRECTIONS FOR USE

Livestock Spray is a dual-purpose formulation designed to protect dairy cattle, beef cattle and horses from the attacks of biting flies, in the barn and on the pasture, as well as to function as an effective space spray for quick knockdown and kill of houseflies in the barn and milkroom.

Animal Spray — Dairy Cattle, Beef Cattle, Horses: To protect animals against the attacks of horseflies, stable flies, horn flies, mosquitoes and gnats, apply just enough to wet the ends of the hairs but not enough to soak the hide. One to two ounces is sufficient to treat an adult cow. Apply once daily, preferably in the morning. Repeat at daily intervals or as necessary for continued protection.

Space Spray — Barn and Milkroom: To attain quick knockdown and kill of flies, gnats and mosquitoes in enclosed spaces, spray toward the ceiling and corners until the space is filled with a light mist. For best results, close all windows and doors prior to spraying and keep them closed for 10 to 15 minutes after spraying. Sweep up and destroy fallen insects.

NOTICE: Seller's guarantee shall be limited to the terms on the label, and subject thereto the buyer assumes any risk to persons or property arising out of use or handling and accepts the product on these conditions.

LIVESTOCK SPRAY

(Dairy Cattle, Beef Cattle, Horses)

ACTIVE INGREDIENTS:	100%
Pyrethrins06%
*Piperonyl butoxide, technical12%
