

The presence of algae in outdoor swimming pools is objectionable because of the color, cloudiness, odor, and increased chlorine demand of the water. The use of Algaecide will help to maintain the water in a clean condition.

Algaecide is compatible with the usual water treatment chemicals. By controlling algae growth with Algaecide, the chlorine demand of the pool may be significantly reduced.

#### DIRECTIONS

Apply along pool edges to the water or apply directly to pool water.

- (1) In freshly filled pools or pools showing no visible algae growth add one gallon Algaecide per 50,000 gallons of water to prevent algae growth.
- (2) If algae growth is observed, add one gallon Algaecide for each 20,000 gallons of water to kill and control those algae species most commonly found in swimming pools. When existing growth is dead and algae have withered, clean the pool, drain and refill if necessary, and add one gallon of Algaecide per 50,000 gallons of water.
- (3) If the pool water treated as in (1) or (2) is recycled, add one gallon of Algaecide per 50,000 gallons of water every five to seven days to maintain between two and five parts per million of active ingredient.

- (4) If the pool water treated as in (1) or (2) above is not recycled or not filtered it should be tested periodically to determine the active ingredient content. When necessary, one gallon Algaecide per 50,000 gallons of water should be added to maintain two to five parts per million of active ingredient.

#### OTHER USES

To disinfect bathing suits and caps: After washing, immerse suits and caps for 10 minutes in a solution containing one ounce of Swimming Pool Algaecide per gallon of water. Rinse, ring and hang to dry.

Disinfection and sanitization in locker room: After cleaning, disinfect surfaces with a solution containing 1 oz. Swimming Pool Algaecide in 2 gallons of water. For sanitization, use 1 oz. to 4 gallons of water. For disinfection of porous or heavily contaminated surface, use 1 oz. of Swimming Pool Algaecide per gallon. Apply so as to wet surfaces thoroughly with the recommended solutions.

**NOTICE:** Seller's guarantee shall be limited to the terms of the label, and subject thereto the buyer assumes any risk to persons or property arising out of use or handling and accepts the product on these conditions.

## SWIMMING POOL ALGAECIDE

### Containing Hyamine 3500

<b>ACTIVE INGREDIENTS:</b>	
n-Alkyl (50% C14, 40% C12, 10% C16) dimethyl benzyl ammonium chloride	10.0%
ethanol	2.5%
<b>INERT INGREDIENTS:</b>	87.5%

#### DANGER

#### KEEP OUT OF THE REACH OF CHILDREN

Corrosive. Swimming Pool Algaecide may cause eye damage and skin irritation. Do not get in eyes, on skin or on clothing. Wear goggles or face shield and rubber gloves when handling. Harmful or fatal if swallowed. Avoid contamination of food.

**FIRST AID:** In case of contact, immediately flush eyes or skin with plenty of water for at least 15 minutes. For eyes, call a physician. Remove and wash contaminated clothing before reuse.

If swallowed, drink promptly a large quantity of milk, egg whites, gelatin solution or if these are not available, drink large quantities of water. Avoid alcohol. Call a physician immediately.

**NOTE TO PHYSICIAN:** Probable mucosal damage may contraindicate the use of gastric lavage. Measures against circulatory shock, respiratory depression and convulsion may be needed.

This product is toxic to fish. Treated effluent should not be discharged where it will drain into lakes, ponds, streams or public water. Apply this product only as specified on this label.

Rinse container thoroughly with water and discard it.
