3-WAY ACTION
Crabgrass Killer/Fertilizer/Insecticide

treats 2500 sq. ft.

New BALAN^R_{TM} Kills CRABGRASS, FOXTAIL and BERNYARD GRASS at sprouting--one of the most effective grass weed killers available.

FERTILIZES YOUR LAWN with special 15-8-4 formulation of necessary nitrogen, phosphorus and potash.

KILLS GRUBS AND OTHER LAWN-DAMAGING SOIL INSECTS with one of the most effective soil insecticides available. Controls Ants, Japanese Beetle Larvae, White Fringed Beetle Larvae and White Grubs.

CONVENIENT & ECONOMICAL--One application does three important lawn chores--saving time, work and money. This product will not damage established bluegrass, ryegrass, fescue, coysia, Bermuda, St. Augustine and centipede grass turfs when applied as directed. Do not apply to bent grass turfs. Do not apply in spring to turfs planted the previous fall. On fall-seeded turfs, use Summertime Crabgrass Control.

WHEN TO APPLY: Apply 3-Way Action anytime in the spring before crab grass germinates. DO NOT SOW GRASS SEED FOR 42 DAYS AFTER APPLICATION.

HOW TO APPLY: It is important that 3-Way Action be applied evenly over your lawn without skips or misses. Do not over-apply or under-apply. The contents of one bag should be applied for every 2500 sq. ft. of lawn area (for example, 50x50=2500 sq. ft.) If your lawn measures 50x100 (or 5000 sq. ft) 2 bags are sufficient.

1. Using proper spreader setting (see spreader settings table below) (calculated to apply at one-half rate), spread one-half of the required amount of 3-Way Action on your lawn, moving at a steady rate in one direction.
2. Spread the other half of the required amount over the same area moving across or at right angles to the first application. (This minimizes skips and overlaps, insuring good coverage). When turning or stopping spreader, spreader gate should be closed.
