

CERTIFIED C-100 WEED KILLER

Annual Weeds:
Apply one gallon of Certified C-100 Weed Killer (diluted with up to 10 gallons of water) per 150 to 200 square feet when plants are young. Thoroughly wet with a sprayer or sprinkling can, all parts of the plant, particularly the growing tips.

Perennial Weeds:
For best results treat plants during their dormant stage or when nearing maturity. Good results are obtained with Spring application, but Summer applications are not recommended. Apply by spraying 1 to 2 gallons of Certified C-100 Weed Killer per 100 square feet. For deep rooted weeds and grass, such as Bermuda, Johnson, Bindweed and Quack grass the heavier rate is recommended. Re-treatment may be necessary to secure adequate control of certain hard-to-kill weeds.

Note: This material is non-selective and affects all types of vegetation. Extreme care should be exercised in its use to prevent killing lawns, shrubs, trees and other valuable plants. This includes the treatment of areas which may be underlaid by tree roots.

Do not reuse empty container. Destroy by burying in a safe place. Do not burn.

CAUTION: Harmful if swallowed. Avoid contamination of feed and foodstuffs. Keep away from children and domestic animals.

NOTICE

KEEP FROM FREEZING. If this product is stored in cold or freezing weather it may separate or thicken. This will not harm the performance. Before using, warm to room temperature and stir thoroughly.

PRINTED IN U.S.A.

C-100 CAN BE DILUTED WITH UP TO 10 PARTS WATER.
NON-FLAMMABLE NON-SELECTIVE
READY TO USE
