## DIRECTIONS FOR USE

### ONE OUNCE MEASURING SCOOP ENCLOSED

A special powder formulation for planter box treatment of seed corn, prior to planting, to aid in the protection of the germinating seeds and young seedlings against seed corn maggots, seed corn beetles.

Keep Planter Plates Clean: Grease or oil on plates can cause clogging.

Planter Box Application: Use on SEED CORN by mixing with the seed in the planter box at the rate of 6 ounces (6 rounded scoops) per bushel. Sift directly on the seed in the planter box, or may be mixed in a rotating container such as a cement mixer. Best protection will be obtained where every seed is coated with the chemical. DO NOT USE treated seed for food, feed or oil purposes.

**WARNING: MAY BE FATAL IF SWALLOWED. MAY BE ABSORBED THROUGH SKIN.** Do not breathe dust. Avoid contact with skin, eyes and clothing. Wash thoroughly with soap and water after handling. Avoid contamination of feed and foodstuffs. Keep out of reach of domestic animals. Do not use on household pets or humans.

Treated seeds exposed on soil surface will be hazardous to birds and other wildlife. Do not use treated seed for feed, food or oil purposes. Destroy empty container—crush, bury.

**NOTICE:** Seller's guarantee shall be limited to the terms of the label, and subject thereto the buyer assumes all risk to persons or property arising out of use or handling and accepts the product on these conditions.
