

HOME AND GARDEN PYRETHRIN INSECTICIDE

INDOORS and OUTDOORS

PRESSURIZED SPRAY
SHAKE WELL BEFORE USE

ACTIVE INGREDIENTS (by weight)	
Pyrethrins	0.25%
*Piperonyl butoxide, technical	0.50%
**N-octyl bicycloheptene dicarboximide	0.50%
Petroleum distillate	1.00%
INERT INGREDIENTS (by weight)	
	97.75%
Total	
	100.00%

*Consists of 0.4% (butylcarbityl) (6-propylpiperonyl) ether and 0.1% related compounds

**MGK 264 Insecticide Synergist, U. S. Pat. No. 2,476,512

CAUTION
CONTENTS UNDER PRESSURE
KEEP OUT OF REACH OF CHILDREN

NET WT. 14 OZ.

ECONOMY PRODUCTS COMPANY, INC.

SHENANDOAH, IOWA 51601

DIRECTIONS

SHAKE BEFORE USE — HOLD CONTAINER UPRIGHT

APPLY IN SHORT BURSTS — SHAKE OCCASIONALLY DURING USE

INDOORS: For House Plants, spray in short bursts, holding the can 18 inches from foliage of English Ivy and African Violets. Spray both sides of the leaves lightly. Do not wet. Repeat as often as necessary. Kills aphids (plant lice), spider mites, exposed thrips, and lace bugs.

To kill **Flies, Mosquitoes, Gnats, Wasps** and **Flying Moths:** Close doors and windows and direct spray upward into center of room with a slow sweeping motion. Keep nozzle 3 feet from surfaces. Fill the infested closed room with mist. Keep room closed for 15 minutes after spraying.

To kill **Roaches, Waterbugs, Silverfish, Crickets** and **Ants:** Spray baseboards, cracks, crevices, moist areas, and openings around sinks, pipes and other hiding places, hitting the insects directly. Spray ant hills and ant trails over window and door sills and other locations.

OUTDOORS: To kill sucking and chewing insects, spray directly on insects. Use on **Aster, Gladiolus** (aphid, leafhopper, thrip (exposed), mites); **Azaleas** (aphid, thrips (exposed), lace bug, mites); **Begonias, Delphinium, Iris** (aphid, thrips (exposed), mites); **Chrysanthemum** (aphid, leafhopper, thrip (exposed), lace bug, yellow woollybear caterpillar, mites); **Dahlia** (aphid, leafhopper, thrips (exposed), yellow woollybear caterpillar, Japanese beetle, mites); **Marigold** (leafhopper, thrip (exposed), yellow woollybear caterpillar, cutworm (climbing), mites); **Petunia** (leafhopper, yellow woollybear caterpillar, mites); **Rose** (aphid, leafhopper, thrip (exposed), yellow woollybear caterpillar, Japanese beetle).

Also, for use on evergreens and small ornamental deciduous trees, shrubs and vines for aphid, leafhopper, spider mite, thrip (exposed), lace bug, and Japanese beetle.

For best results spray in evening or on a cloudy day when air is still. Use slow sweeping motion. Keep can 18 inches from plants. Avoid wetting foliage with the spray. Spray rows at the rate of 1 foot per second. For heavy growth, spray rows on both sides. Repeat when needed. Spray with caution on young plants and new growth. Do not spray when temperature exceeds 90°F.

CAUTION

Contents under pressure. Do not puncture the can. Never throw in fire or incinerator. Do not expose to heat—radiators, stoves, heat from sun or confined heat in display windows, automobiles, etc.—where temperature might exceed 120°F. Cover or remove fish bowls for 1 hour. Remove bird cages from room being sprayed. Cover exposed food and utensils. Do not spray on plastics, asphalt tile or furniture.

HOW TO OPERATE

Remove protective cover. Be sure spray nozzle points outward. Press down on push button valve.
