methyl Epycymobicyc
phosphorothioate
Resonon
Other Carb. Resonon
INERT INGREDIENTS

Directions:

For complete directions see the label on the container of this product. Prepared by Economy Products Company, Shenandoah, Iowa.

HANDY READY TO USE DUST GUN

TO OPERATE — Remove tape from vent and use pumping stroke.

Dust underneath and top of foliage thoroughly. Apply to both plants and insects. Begin application when plants are well established or when new growth appears. Dust early in the morning or evening when air is calm. Repeat every 7 to 10 days or as necessary, whether insects or diseases are present or not to help prevent infestation. Use freely on the soil around garden plants for added protection against certain insects which work at the surface.

CONTROL CHART

Apply before plants are infested and damaged by the following insects and diseases:

1 Day Interval Between Last Application and Harvest:
Corn, Sweet: Helminthosporium Leaf Blight, Flea Beetle, Japanese Beetle, Corn Earworm. Do not feed forage to dairy animals or animals being finished for slaughter.
