GENERAL DIRECTIONS

REMARKS

HAND DUSTING — Apply approximately 2 oz. of dust by shaker can, rotary duster or by spoon to the upper portions of the back, neck and poll, and to the face as an aid in the control of face flies. Rub in lightly to carry the dust beneath the hair. Repeat as necessary.

SWINE — Lice: Hand Dusting—Apply 3-4 oz. of dust by conventional hand or power duster to each animal with special attention given to the neck and around the ears. Repeat as necessary but not more often than once every 14 days. In severe infestation, both individual animals and bedding may be treated. One pound of 3% dust should be applied per 150 sq. ft. of bedding.

SELF-TREATING DUST BAG

FORCED USE — Put RABON[®] Livestock Dust in cotton cloth or double burlap bags or use pre-packed weather-proof cattle dust bags and hang in barn door exits or alleyways leading from animal buildings, salt or mineral blocks, or watering holes. Protect cloth or burlap bags from weather.

FREE CHOICE USE — Use the same dust bags as above but place in loafing sheds, holding pens, feed-lots, near watering holes or other areas where cattle gather. The free choice use aids in the control of lice.
