

## DIRECTIONS FOR USE

**SUBTERRANEAN TERMITES** — Directions for **Non-Professional Use:** Use Earl May Chlordane E. C. in a 1% water emulsion. Prepare a 1% emulsion as follows: Add 1 gallon Earl May Chlordane E. C. to 49 gallons of water (2 1/2 tablespoons to 1 gallon) for a 1% emulsion. Apply this emulsion as follows:

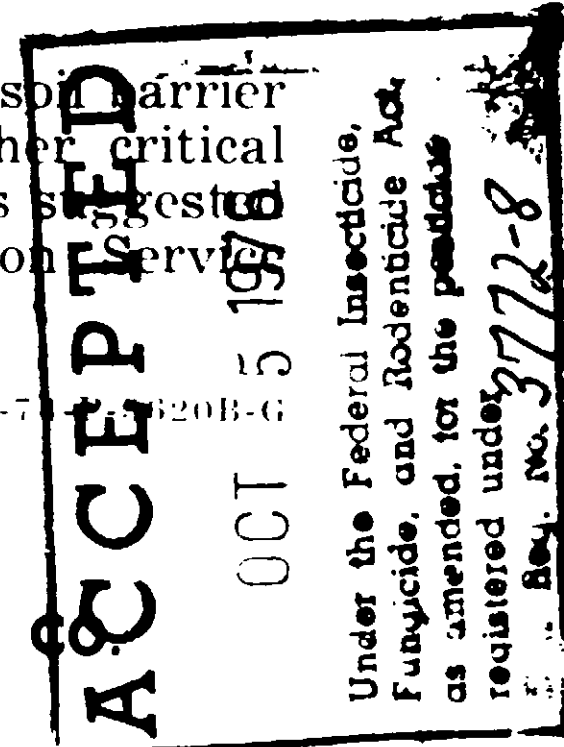

### Buildings Having Basements or Crawl Spaces

Dig a trench along the outside of the foundation walls. In brick or hollow block or concrete foundations, dig a trench to, but not below, the footing. Then as the trench is refilled, treat the soil at the rate of 4 gallons per 10 linear feet for each foot of depth. A trench 3 feet deep would require 12 gallons per 10 linear feet.

The objective is to establish a treated soil barrier which will prevent termite entry. Other critical areas may also require treatment. It is suggested that you consult the State Extension Service for advice.
