

CHLORDANE E. C.

FOR TERMITE CONTROL

ACCEPTED

ACTIVE INGREDIENTS:	MAR 1 1 1983	
*Technical Chlordane	42.00%	
Aromatic Petroleum Hydrocarbons	54.00%	
INERT INGREDIENTS	4.00%	
Total	100.00%	

*Equivalent to 25.37% Octachloro-4, 7-methanotetrahydroindane and 16.92% related compounds.

KEEP OUT OF THE REACH OF CHILDREN CAUTION

STATEMENT OF PRACTICAL TREATMENT

- If swallowed** — Call a physician or Poison Control Center immediately. Gastric lavage is indicated if material was taken internally. **DO NOT INDUCE VOMITING**; vomiting may cause aspiration pneumonia.
- If inhaled** — Remove victim to fresh air. Apply artificial respiration if indicated.
- If on skin** — Remove contaminated clothing and wash affected areas with soap and water.
- If in eyes** — Flush eyes with plenty of water. Get medical attention immediately.

termite infestation. Soil should be treated with heat or by other means. Heat should be applied to the treated soil for a minimum of 100 degrees Fahrenheit.

The object is to establish a treated zone in which will prevent termite entry. Termite infestations may also require treatment of areas which are inaccessible areas, basements or slab type construction. It is suggested that you contact the Agricultural Cooperative Extension Service for assistance or consult the Commercial Pest Control Service.

Avoid contamination of public or private water supplies by following these directions. Do not allow a hose or any type of filler extension to reach into the termite chemical solution while filling or mixing this material with water. Use anti-siphon or anti-siphonage equipment on all filling equipment. These devices can be purchased at hardware or plumbing supply stores. Use of anti-siphon equipment will help to insure that the user of this toxic chemical will not contaminate public water supplies. Refer to Federal (Federal Housing Administration) and state and local regulations for safe distances of treatment areas from wells. Soil in the vicinity of wells, cisterns or ponds should not be treated if the water saturated is subject to excessive saturation due to an accumulation of water or if the soil to be treated is in the perimeter of the structure is at a grade lower than surrounding yard or property area. If this is the situation treat as follows: **Do Not Apply Under Pressure**. Soil should be removed to an area safe from well or domestic water contamination, treated, allowed to stand undisturbed for two to four days, then returned to the trench which has been lined with 4 mil plastic sheeting. Be careful not to puncture the plastic sheeting when returning soil to the trench. Do not treat structures that contain cisterns or wells.

RETREATMENT RESTRICTIONS

- Retreatment of infested areas should only be made when there is evidence of reinfestation subsequent to the initial treatment or there has been a cessation of the chemical carrier in the soil due to construction, excavation, landscaping, etc.
- Retreatment should be made in the areas only as indicated with the application techniques described above. This application should be made as a spot treatment to these areas.

Routine retreatment of the entire treated area should be avoided.

NOTICE

Never use this material in soil, water, or drainage of this material in strict accordance with directions given hereon.

Pyrenone[®] DIAZINON AQUEOUS BASE

FOR FORMULATION OF INSECTICIDES ONLY

STORAGE AND DISPOSAL

EPA Reg. No. 1816-621

FPA Ist. No. 279-NY-1

ACTIVE INGREDIENTS:

Pyrethrins.....	0.520%
*Piperonyl Butoxide, Technical.....	2.600%
**Diazinon.....	5.000%
Petroleum Distillate.....	2.080%
INERT INGREDIENTS:.....	89.800%
	<u>100.000%</u>

*Equivalent to min. 2.08% (butylcarbityl(6-propylpiperonyl) ether and 0.52% related compounds.

**0,0-Diethyl 0-(2-isopropyl-6-methyl-4-pyrimidinyl) phosphorothioate.

ACCEPTED
APR 7 1983
EPA Reg. No. 1816-621

Do not contaminate water, food or feed by storage or disposal.

PESTICIDE STORAGE: Do not transport or store below 32°F. If freezing occurs, thaw and agitate.

PESTICIDE DISPOSAL:

Pesticide spray mixture or rinse water that cannot be used according to label instructions must be disposed of according to applicable Federal, State or local procedures.

CONTAINER DISPOSAL:

Triple rinse (or equivalent) then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or by other approved State and local authorities.

**PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS & DOMESTIC ANIMALS**

CAUTION

Harmful if swallowed. Avoid inhalation of vapor. May be absorbed through skin. Avoid contact with skin, eyes and clothing. Wash thoroughly after handling and before smoking and eating. Avoid contamination of feed and foodstuffs.

STATEMENT OF PRACTICAL TREATMENT

If Swallowed: Drink one or two glasses of water and induce vomiting by touching the back of the throat with finger. Repeat until vomit fluid is clear. Call a physician immediately. Do not induce vomiting or give anything by mouth to an unconscious person.

If Inhaled: Remove victim to fresh air. Apply artificial respiration if indicated.

If On Skin: Remove contaminated clothing and wash affected areas with soap and water.

If In Eyes: Flush eyes with plenty of water. Call a physician if irritation persists.

NOTE TO PHYSICIAN

This product contains a cholinesterase inhibitor. If signs of cholinesterase inhibition are present, Atropine is antidotal. 2-PAM may be administered in conjunction with Atropine.

ENVIRONMENTAL HAZARDS

This product is toxic to fish, birds, and other wildlife. Do not apply directly to lakes, streams or ponds. Do not contaminate water by cleaning of equipment or disposal of wastes. Do not discharge into lakes, streams, ponds or public waters unless in accordance with an NPDES permit.

Buyer assumes all risks of use, storage or handling of this product not in strict accordance with directions given herewith.
