

Use Earl May
RABBIT SCAT

On flowers and shrubs at any time - - - - -

On leafy vegetables such as collards, kale and spinach during the early stage of growth only.

On other type vegetables such as brussels sprouts, cucumbers, eggplant, peppers, pumpkins, radishes, summer and winter squash, tomatoes, turnips. May also be used on cantaloupes, muskmelons, and watermelons. May be used up to 7 days of harvest on broccoli, cabbage, cauliflower, kohlrabi, peas, beets and carrots. Use on potatoes as foliage application only. May be used up to 4 days of picking on snap beans.

Caution: Wash all repellent residue from edible portions of plants before eating.

DUST

Apply Earl May Rabbit Scat directly from the convenient shaker top container by dusting the plants uniformly. The dust may also be applied with a hand duster.

SPRAY

Contents of the 6 oz. can will make 2½ gallons of spray. For less volume, use 4 teaspoonfuls per pint of water. For easy mixing, paste the material with a small amount of water - then dilute. Repeat application after rains or any appreciable new growth of plant.

CAUTION

May be Harmful if Swallowed or Inhaled. Avoid breathing dust. May cause irritation of nose, throat and skin. Avoid contact with eyes, skin, or clothing. Flush with plenty of water. For eyes, get medical attention.

This product is toxic to fish. Keep out of ornamental fish ponds. Keep out of any body of water.

Do not reuse empty container. Destroy by burying with waste or burning. Stay away from smoke or fumes.

PROTECT

Vegetable crops and ornamental plants from the feeding damage of rabbits. Earl May Rabbit Scat works on the principle of taste repellency. Rabbits do not like the taste of foliage or plants protected with this material -- an effective and positive protection.
