

GERM-I-SAN

The New Beverage Glass Cleaner Sanitizer for Bars & Restaurants

Does not leave any visible film on dishes or glassware. Does not affect the head on Beer. Does not leave any residual odors or flavor after air drying.

DIRECTIONS FOR USE

For glassware, dishes, etc., add 1 ounce of GERM-I-SAN to 5 gallons of water in sink number one. Rinse in sink number two in clear water. Then sanitize in sink number three using 1 ounce of GERM-I-SAN in 5 gallons of water. This will provide 25ppm of titratable iodine. Dishes and glassware should be air dried.

GERM-I-SAN acts rapidly, killing most pathogenic bacteria. When used full strength in heavily germ infested areas, cut 1 part GERM-I-SAN to 2 parts water on porous surfaces, cut 1 part GERM-I-SAN to 1 part water on hard surfaces.

UNLIKE MOST OTHER CLEANER - SANITIZERS, GERM-I-SAN PROVIDES ITS OWN INDICATOR OF OXIDIZING ACTIVITY. When the brown or amber tint of ferric sesquioxide, the GERM-I-SAN indicator is active. When the color goes, the solution must be replaced. Public Health codes require a two-minute immersion in the sanitizing solution. Even though GERM-I-SAN acts very rapidly Public Health regulations should be followed. GERM-I-SAN can be used satisfactorily in 2 or 3 sink systems. Local regulations should be followed. For cleaning and disinfecting in one operation, areas where food is prepared, scrub with a solution of 6 ounces of GERM-I-SAN in 5 gallons of water. For porous surfaces or those difficult to clean, use 6 ounces of GERM-I-SAN in 2 1/2 gallons of water. GERM-I-SAN is not adversely affected by water hardness or cold water.

WARNING

Do not reuse empty drum. Return to drum reconitioner or destroy by perforating or crushing and burying in a safe place.

GERM-I-SAN A New Type Cleaner - Sanitizer For Food and Beverage Utensils DIRECTIONS FOR USE (continued)

GENERAL HOSPITAL SANITATION: Thermometers, Hospital Bed Frames, Bed-pans, Urinals - Rinse or store fresh solution of the same strength. Clean and disinfect in one operation with a solution of 5 ounces GERM-I-SAN Concentrate to each five gallons of water.

SURGICAL INSTRUMENTS must be pre-cleaned to remove all adhering blood serum residues prior to immersion in, or treatment with the disinfecting solution.

DISINFECTANT: Clean and disinfect all food and beverage utensils with a solution of 1 ounce GERM-I-SAN Concentrate to each five gallons of water.

DAILY FLASKS, FUNDS and UDDERS: Using a clean glass bowl for each row, wipe flasks and udders with a solution of 1 ounce GERM-I-SAN Concentrate to each five gallons of water.

MILKING MACHINE AND UTENSILS: Flush remaining milk from all equipment with lukewarm water after each milking. Take disassembled apart and immerse all parts, except pistons, in solution of 1 ounce GERM-I-SAN Concentrate to each five gallons of water and brush thoroughly. Use the same method to clean and sanitize strainers, wash pails, etc., in the same solution. Rinse with warm water, reassemble and rack in clean, dust-proof place. Before using equipment previously cleaned as above, sanitize with a solution of 1 ounce GERM-I-SAN Concentrate to each five gallons of water.

WARNING

Harmful if swallowed. Causes skin and eye irritation. Avoid contact with skin, eyes or clothing. If in contact, flush thoroughly with water. If irritation persists, get medical attention. For eyes flush thoroughly and get medical attention.
