

BETZ®

slimicide

SLIME CONTROL AGENT

FORMULA

A9

DANGER—TOXIC — HARMFUL IF SWALLOWED. Avoid inhaling. Causes skin irritations. Causes severe eye damage. Do not get into eyes, on skin or clothing. Wear rubber gloves, and goggles or face shield, when handling. In case of contact with skin, wash well with soap and water. In case of contact with eyes, flush promptly and thoroughly with clear water. In case of ingestion or contact with eyes, secure immediate medical attention.

This product is toxic to fish and wildlife. Treated effluent should not be discharged where it will drain into lakes, ponds, streams, or public waters. Do not contaminate water by cleaning of equipment or disposal of wastes. Apply the product only as specified on this label.

Do not reuse empty container. Send to drum reconditioner, or destroy by perforating or crushing and bury in a safe place.

CAUTION—COMBUSTIBLE. Keep away from heat and open flame. Keep container closed when not in use.

DIRECTIONS FOR USE — Betz Slimicide A-9 aids in the control of objectionable forms of bacteria and fungi and algal deposits in recirculating cooling-tower water equipment.

This product may be fed intermittently daily, or as needed, at a rate between 0.2 and 1.0 pounds, per thousand gallons of water contained in the system. The frequency of feeding will depend upon the severity of slime and algal deposits.

If the slime and algae problem is severe, initial high dosages should be utilized for a time sufficient to clean the system. In the event the cooling tower is badly fouled, precleaning is recommended.

Chlorine residuals in cooling waters may affect the primary active ingredients of this product containing more than 0.5 part per million (ppm) residual chlorine.

FOR INDUSTRIAL USE ONLY. Technical advice regarding specific site problems is available from the manufacturer.

DIRECTIONS FOR USE—Betz Slimicide A-9 aids in the control of objectionable forms of bacteria and fungi and algal deposits in recirculating cooling-tower water equipment.

This product may be fed intermittently daily, or as needed, at a rate between 0.2 and 1.0 pound, or 2.5 and 12.0 fluid ounces, per thousand gallons of water contained in the system. The frequency of feeding and duration of treatment depend upon the severity of slime and algal deposits.

If the slime and algae problem is severe, initial high dosages should be utilized for a time sufficient to obtain control of the system. In the event the cooling tower is badly fouled, precleaning is recommended.

Chlorine residuals in cooling waters may affect the primary active ingredients of this product. Do not use in waters containing more than 0.5 part per million (ppm) residual chlorine.

FOR INDUSTRIAL USE ONLY. Technical advice regarding specific site problems is available from BETZ.
