**DIRECTIONS FOR USE**

**Annual Weeds:**

Apply one gallon of Certified C-795 Weed Killer (diluted with up to 10 gallons of water) per 150 to 200 square feet when plants are young. Thoroughly wet with a sprayer or sprinkling can all parts of the plant, particularly the growing tips.

**Perennial Weeds:**

For best results treat plants during their dormant stage or when nearing maturity. Good results are obtained with Spring application, but Summer applications are not recommended. Apply by spraying 1 to 2 gallons of Certified C-795 Weed Killer per 100 square feet. For deep rooted weeds and grass such as Bermuda, Johnson, Bindweed and Quack grass, the heavier rate is recommended. Re-treatment may be necessary to secure adequate control of certain hard-to-kill weeds.

**Note:** This material is non-selective and affects all types of vegetation. Extreme care should be exercised in its use to prevent killing lawns, shrubs, trees and other valuable plants. This includes the treatment of areas which may be underlaid by tree roots.

Due to the varied conditions of weather, soil, types of vegetation, location and time of applications, the manufacturer does not guarantee complete kill of vegetation or accept responsibility for its use or misuse.

**CAUTION:** Avoid contamination of feed and foodstuffs. Keep away from children and domestic animals. Harmful if swallowed.

**NOTICE**

**KEEP FROM FREEZING.** If this product is stored in cold or freezing weather it may separate or thicken. This will not harm the performance. Before using, warm to room temperature and stir thoroughly.

**ENVIRONMENTAL CAUTIONS:** Do not contaminate domestic or irrigation water by cleaning of equipment or disposal of wastes. **APPLY THIS PRODUCT ONLY AS SPECIFIED ON THIS LABEL.**
