

DIRECTIONS

DAWSON MALATHION CONCENTRATE No. 3 is suitable for a variety of uses. It is effective as a contact and residual spray to control stored-products insects and to reduce housefly populations. It may be used as a clean-up spray for empty grain bins and for grain facilities generally. It is effective as a top dressing for grain in storage to prevent or control infestations of surface-feeding insects. It is not suitable for the treatment of grain as it is binned, as a grain protectant.

DILUTION. For general residual spraying applications add 2½ gallons of this concentrate to 50 gallons of a good grade of deodorized kerosene. Mix well. The resulting diluted spray contains 2.33% malathion; .063% piperonyl butoxide; .025% pyrethrins.

TOP DRESSING FOR GRAIN IN STORAGE: Add 5 gallons of this concentrate to 50 gallons of a good grade deodorized kerosene. Mix well. The resulting diluted spray contains 4.49% malathion; .125% piperonyl butoxide; .05% pyrethrins. Allow one gallon of spray for each 1000 square feet of grain surface. Much more effective results will be obtained, especially if infestation has already appeared, if this spray is raked into the surface to a depth of 3 or 4 inches and the surface sprayed again at the same rate. Also, spray the walls and inside roof surfaces. Apply the first spray about the time infestation may first begin to appear in the summer. Repeat the application every 4 or 5 weeks during the infestation season.

FOR GENERAL RESIDUAL SPRAYING AND FOR CLEAN-UP SPRAY FOR EMPTY GRAIN BINS AND ADJACENT AREAS: First carefully clean the areas to be sprayed. You cannot expect to obtain effective results with this or any other residual spray if it is applied to dusty, dirty surfaces. For all types of residual spraying applications, use a low pressure pump up type sprayer equipped with a high quality flat stream nozzle that produces a flat, oval pattern of coarse spray droplets with a minimum of mist. If your sprayer is not so equipped it will pay you to purchase such a nozzle. Flat Spray Tee-Jet Nozzle No. 8001, from Sprayer Systems Company, 3201 Randolph Street, Bellwood, Ill. Spray all surfaces until they are wet, giving special attention to cracks, crevices and out of the way places where insects may harbor.

DAWSON[®]

Malathion **No. 3** Concentrate

INSECTICIDE

Formulated with PREMIUM GRADE MALATHION

DAWSON MALATHION CONCENTRATE No. 3 is formulated so that 2½ gallons of the concentrate, when diluted with 50 gallons of a good grade of deodorized kerosene, will provide the user with 52½ gallons of an effective combination of contact and residual spray for such surfaces as walls, floors, loading dock areas and other non-food surfaces.

DAWSON MALATHION CONCENTRATE No. 3 kills on contact and by residual action, Rice Weevil, Granary Weevil, Saw-Toothed Grain Beetles, Flat Grain Beetles, Flour Beetles, Lesser Grain Borer, Indian Meal Moth, Angoumois Grain Moth and certain other stored-product insects.

CAUTION

KEEP OUT OF REACH OF CHILDREN

Harmful if swallowed. Harmful vapors may cause irritation of skin and eyes. May be absorbed through skin. Avoid inhalation of vapors and spray. Avoid contact with skin. Wash thoroughly after using.

See label for first aid instructions.

Call a physician immediately. In case of contact wash with soap and water. For eyes, flush with plenty of water. Provide maximum ventilation during application. Do not store near food or feedstuffs.

DO NOT USE THIS PRODUCT UNTIL AFTER IT HAS BEEN DILUTED WITH OIL IN ACCORDANCE WITH DIRECTIONS.

PRECAUTIONS

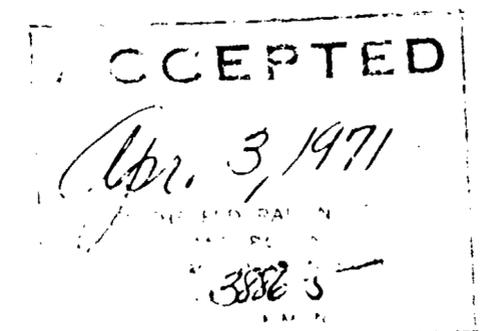

IMPORTANT: Avoid contact with skin. May be absorbed through the skin. Wash thoroughly after using. Provide maximum ventilation during application with low pressure sprayer as a residual spray. Close all open containers and processing equipment before spraying. Do not apply directly to any food or feedstuffs or to bags or other absorptive containers. Cover, or if possible remove from buildings, packaged cereals or other foodstuffs. Apply to clean surfaces only. Thorough, extensive, careful application within the entire building at infrequent intervals will give far superior results than frequent spotted applications.

This product is toxic to fish. Do not contaminate water by cleaning of equipment or disposal of wastes.

NOTICE

Seller warrants that the product conforms to its chemical description and is reasonably fit for the purpose stated on the label when used in accordance with directions under normal conditions of use, but neither this warranty nor any other warranty of merchantability or fitness for a particular purpose, express or implied, extends to the use of this product contrary to label instructions, or under abnormal conditions, or under conditions not reasonably foreseeable to seller, and buyer assumes the risk of any such use.
