Echols Roach Tablets

Active Ingredient 40%
Boric Acid 60%
Inert Ingredients

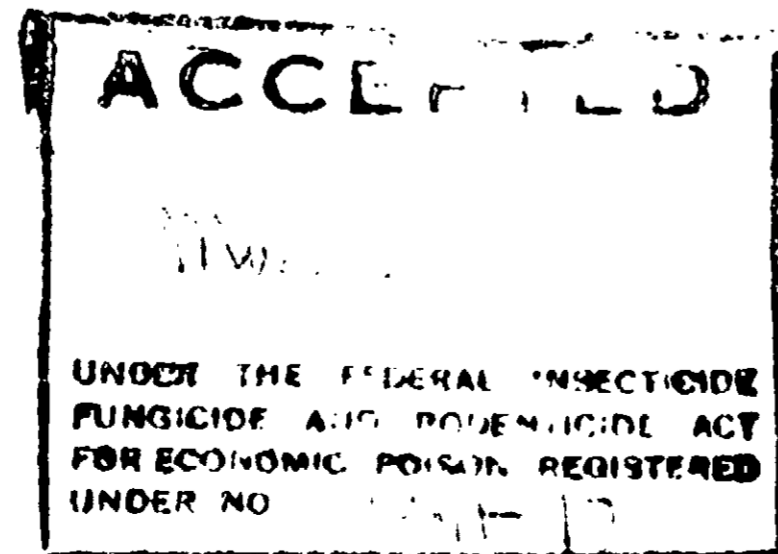

New Echols Roach Tablets are a specially prepared bait to kill and control roaches, waterbugs and silverfish. Place tablets wherever insects have been seen. Use liberally in infested areas. Pour crushed portions into crevices. Use in shelves, drawers, closets; attach with cellophane tape underneath drawers and inside cabinets where roaches often breed and hide. Tablets may also be used near sinks, in bathroom, behind garbage cans, etc. Insect pests crawl off and die after they feed on tablets. Keep as much other food out of reach of insects as possible. By regular use tablets will keep these pests under constant control. Caution: Apply only in area inaccessible to children and pets. Avoid contamination of foodstuffs.
