Hold can upright. Remove cap. Point valve opening away from face. With wind at back, aim at nests in trees, bushes, under leaves, chimneys, cracks or crevices, etc.

For Indoor Use: Point valve opening away from face. Aim directly at nests under rafters, etc. Do not spray in areas where foods and feedstuffs are exposed or handled. Do not remain in treated areas. Ventilate the area after treatment is completed.

Thoroughly saturate nest with spray, contacting as many insects as possible. To prevent insects from falling on skin and clothes, do not stand directly under nest. Best results can be obtained if nest is sprayed in late evening when most insects are at rest. If reinfestation occurs, repeat treatment.
