

**PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS**

CAUTION

KEEP OUT OF REACH OF CHILDREN. Harmful if swallowed. May cause eye damage and skin irritation. Do not get in eyes, on skin or on clothing. Avoid contamination of food.

STATEMENT OF PRACTICAL TREATMENT

FIRST AID PROCEDURES: **Eyes:** Flush with plenty of water for at least 15 minutes. Call a physician. **Skin:** Wash with plenty of water for at least 15 minutes. Call a physician. **Ingestion:** Do not induce vomiting. Call a physician immediately.

ENVIRONMENTAL HAZARDS

This product is toxic to fish and wildlife. Keep out of lakes, streams or ponds.

PHYSICAL OR CHEMICAL HAZARDS

Do not use, pour, spill or store near heat or open flame. Store at temperatures above 32°F.

STORAGE AND DISPOSAL

STORAGE: Keep product in original container. Do not put concentrate or dilute into food or drink containers. Do not contaminate feed, foodstuffs or drinking water. Do not store or transport near feed or food. Store at temperatures above 32°F.

CONTAINER DISPOSAL: Triple rinse (or equivalent). Then offer for recycling or reconditioning or puncture and dispose of in a sanitary landfill, or by other procedures approved by State and local authorities.

SANI-MOP-MIST

**BACTERIOSTATIC
MOP TREATMENT**

Active Ingredients:

n-Alkyl C₁₂ 50%, C₁₂ 40%, C₁₆ 10%)

dimethyl benzyl ammonium chloride 0.28%

Inert Ingredients: 99.72%

Total 100.00%

KEEP OUT OF REACH OF CHILDREN.

CAUTION

HARMFUL IF SWALLOWED.

See left panel for further precautions.

DIRECTIONS

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. This scientifically formulated product with a clean wintergreen fragrance is used to treat sweeping mops and dust cloths for excellent floor maintenance. This product contains bacteriostatic agents to inhibit the growth of bacteria in mops and dust cloths. It may be used on all floors when used as directed.

Spray or sprinkle the entire dry mop until moist. Make the application as evenly as possible to all areas of the mop checking periodically for penetration deep in the mop strands. This product will inhibit bacterial growth only in the areas where penetration has occurred. On heavy mops a second application may be necessary before use to obtain thorough penetration. Allow 45 minutes after application for thorough, even saturation before using mop. Ends of mop strands should be moist but not wet.

Sweep normally with mop until it becomes soiled, then unload mop by shaking sharply. This product causes dust and dirt to cling together in coarse particles and permits the mop to be unloaded anywhere without recirculating dust.

To treat dust cloths: Spray or sprinkle any clean, dry, soft, lint-free cloth until it is moist over all areas. Sprinkle both sides to assure faster penetration. Dust cloth is ready for use after 45 minutes from time of treatment.
