*Registered trademark of Fairfield Chem. Div. of Food Machinery & Chemical Corp.
DIRECTIONS: Safeticide Brand can be used in all spray guns or atomizer dispensers adjusted to deliver fine mist.

KENNELS: When spraying for flies and ticks around Kennels and Dog Pounds, spray SAFETICIDE BRAND in and around animals sleeping quarters, up the walls and all over the floors. In the control of **FLYING INSECTS**, (as listed above), direct the spray toward the upper portions of the enclosure and fill the atmosphere with mist using 2 or 3 ounces to each 1,000 cubic feet of space. In treating fleas, spraying should include treatment of floors and animal sleeping quarters, along with a light mist spray on the animal. Against **RUNNING AND CRAWLING INSECT PESTS**, (as listed above), treat all areas where these insects are commonly found, and direct the liquid behind baseboards, moldings, furniture, cabinets, shelves, sinks and pipes; toward drains and dark corners, and into cracks, crevices, recesses and similar hiding places. In spraying for carpet beetles, you should include treatment of floors, carpeting and cracks in baseboards. In spraying for clothes moths, treatment should include spraying of the clothing, clothing receptacles every 30 days unless clothing is stored in moth-proof containers. When spraying for clothes moths and carpet beetles, pay particular attention to seams and folds. In spraying for bedbugs, treatment should include spraying of bed, mattresses and hiding places. Repeat when necessary.
