

Pyrenone\*-Type Household Spray contains pyrethrins and piperonyl butoxide. It is an effective insecticide for rapid control of insect pests found in homes, schools, hospitals, restaurants, dairies, bottling plants, grocery stores, meat markets, food and furniture warehouses, poultry and animal farms, hotels, motels, theatres and drive-ins, office and public buildings and any other similar type places or institutions. Use the product as a space spray in food processing plants only when plant is not in operation. Foods should be removed or covered during treatment. All food processing surfaces should be covered or thoroughly cleaned before using. Cover or remove aquaria in areas to be treated.

**CAUTION: INFLAMMABLE** — Do not smoke while spraying, do not spray near or toward open flame. Do not puncture container or dispose of in fire. Container should not be placed where temperature exceeds 120 degrees Fahrenheit. Do not spray directly on painted surfaces.

Safeticide Brand is a Pyrenone\*-Type Spray and will kill on contact the exposed stages of:

**DIRECTIONS FOR USE**

**To Have Flea-less, Tick-less Dogs and Horses,  
Follow Instructions Below:**

To operate remove protective cap. Hold can upright. Point nozzle in desired direction for spray. Press valve down. Point away from face.

**KENNELS:** When spraying for flies and ticks around Kennels and Dog Pounds, spray SAFETICIDE BRAND in and around animals sleeping quarters, up the walls and all over the floors. In the control of FLYING INSECTS, (as listed) direct the spray toward the upper portions of the enclosure and fill the atmosphere with mist, spraying 15 to 20 seconds to each average room. Close windows and doors for about 15 minutes after treatment.

In treating fleas, spraying should include treatment of floors and animal sleeping quarters, along with a light mist spray on the animal. Against RUNNING AND CRAWLING INSECT PESTS, (as listed), treat all areas where these insects are commonly found, and direct the liquid behind baseboards, mouldings, furniture, cabinets, shelves, sinks and pipes; toward drains and dark corners, and into cracks, crevices, recesses and similar hiding places. In spraying for carpet beetles, you should include treatment of floors, carpeting and cracks in baseboards. In spraying for clothes moths, treatment should include spraying of the clothing, clothing receptacles every 30 days unless clothing is stored in moth-proof containers. When spraying for clothes moths and carpet beetles, pay particular attention to seams and folds. In spraying for bedbugs, treatment should include spraying of bed, mattresses and hiding places. Repeat weekly to help prevent insects from multiplying.
