NOTE: Changes in labeling formula differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above U.S. EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby Registered/Reregistered under the Federal Insecticide, Fungicide, and Rodenticide Act.

A copy of the labeling accepted in connection with this Registration/Reregistration is returned herewith.

Registration is in no way to be construed as an indorsement or approval of this product by this Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

This product is additionally registered in accordance with FIFRA sec. 3(c)(7)(A) provided that you:

1. Submit and/or cite all data required for registration or reregistration of your product under FIFRA sec. 3(c)(5) when the Agency requires all registrants of similar products to submit such data.

2. Make the labeling changes listed below before you release the product for shipment:

- Add the phrase, "EPA Registration No. 4091-2."
- Correct the spelling of "vomiting" in the "Statement of Toxicological Treatment" and "by" in the application directions.
- Insert at least below the "Important Statements" section of the product label the following:
- Delete "Dona-Lyn" because it is an implied name of the product.
- The label should advise users as follows: "Treated woods should not be used on wood that will come in contact with food, feed, live stock, or potable water."

f. If the product may cause injury to living plants upon contact during application, the label must advise the users of this potential problem.

3. Submit five (5) copies of your final printed labeling before you release the product for shipment. Refer to the A-79 Enclosure for a further description of final printed labeling.

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA sec. 6(e). Your release for shipment of the product constitutes acceptance of these conditions.

A stamped copy of the label is enclosed for your records.

Sincerely yours,

Henry M. Jacoby

EPA Est. No. 4091-8

SEAL-TREAT II

Seal-Treat II is a clear, water-repellent wood preservative for use on bare exterior wood before painting or for protection of unfinished wood while allowing it to weather naturally. Seal-Treat II contains a fungistat that penetrates deep into the wood fibers to guard against rot, decay and mildew. It also inhibits attack by termites. The special water repellents help seal out moisture to retard warping, swelling and shrinking of wood.

Use above grade on unfinished wood and wood products... millwork, fences, siding, decks, shingles, outdoor furniture and structural lumber. For below grade, use Coppoll's 20% solution of copper naphthenate for lasting protection.

PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS AND DOMESTIC ANIMALS

WARNING: Causes eye damage and skin irritation. Do not get in eyes, on skin, or on clothing. Wear goggles or face shield and rubber gloves when handling. Harmful if swallowed or absorbed through skin. Avoid breathing vapors or spray mist. This product may cause skin sensitization. Use only in a well ventilated area.

STATEMENT OF PRACTICAL TREATMENT: In case of skin contact, wash promptly and thoroughly with soap and water. If product gets in eyes, flush immediately with copious amounts of clean, cool water for 15 to 20 minutes. Get medical attention immediately. If product is swallowed, call a physician or Poison Control Center. Drink 1 or 2 glasses of water and induce vomiting by touching back of throat with finger. Do not induce vomiting, or give anything by mouth to an unconscious person.

NOTE TO PHYSICIAN: Probable mucosal damage may contraindicate the use of gastric lavage. Measure against circulatory shock, respiratory depression, and convulsion may be needed.

ENVIRONMENTAL HAZARDS: This pesticide is toxic to fish. Do not apply directly to water. Permits may be required for discharges containing this pesticide into lakes, streams, ponds, or public water. For guidance, contact the regional office of the Environmental Protection Agency.

PHYSICAL AND CHEMICAL HAZARDS: Do not use or store near heat or open flame. **COMBUSTIBLE.**

KEEP OUT OF REACH OF CHILDREN 9/84

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its label.

SURFACE PENETRATION: All cuttings should be completed before application. Wood must be clean, dry and free of bark and any previous finish. If mildew is present, scrub area with a solution of 1 part household bleach and 3 parts water; let stand 20-30 minutes and rinse with clear water. Then allow to dry thoroughly.

APPLICATION: Mix thoroughly before use. Do not thin. Apply by brushing or spraying of multiple coats. The most effective treatment is obtained by extended soaking where deep penetration and high absorption are obtained. A soaking period of 5 minutes per inch of thickness is recommended.

Use extra care to saturate joints and exposed wood end grain for more effective protection.

PAINTING: Apply only one coat before painting. Allow to dry 24 hours or more before painting with oil-based paints, oil-based stain or oil-based primer for latex paints. Allow to weather 6-12 months if latex paint is to be applied directly over Seal-Treat II.

COVERAGE: Up to 250 sq. ft. per gallon average depending on condition and species of wood.

CLEAN-UP: Clean equipment promptly with paint thinner, mineral spirits or turpentine.

NOTE:

PLANT LIFE: Avoid contact with grass, trees or shrubs during application as damage can occur. Do not use this product in any confined area where the vapors may concentrate and cause injury to plant or animal life. After thoroughly dry, treated wood is not injurious to surrounding plant life.

This product is not intended to treat wood used for food, feed, potable water, living plants, livestock and dairy animal contact surfaces.

IMPORTANT: Treated wood will weather naturally and produce graying and contrasting tones depending upon its exposure. The results of weathering will vary with different exposures and different natural extractives in wood which can produce uneven tones.
