ARK SAN

Cold Disinfection

For disinfection of previously cleaned surgical instruments, barber tools and dental equipment simply submerge instruments into solution containing 1/2 ounce Ark San per gallon of water for 10 minutes.

FOR ROOM FOGGING

Directions:

To minimize the danger of cross-contamination from environmental surfaces, apply solution of Ark San as a fog as described below, before applying standard routine terminal cleaning and disinfecting practices. 1. Remove all human, animal and plant life from room. 2. Open closet doors and drawers. 3. Set on 34" revolving platform in center of room. 4. Mount Jet Fog-Master Tank Model 6208 or other fogging device delivering equivalent spray at 4 RPM. 5. Fill sprayer reservoir with 1.5 oz of Ark San to 1 gallon of water to produce 1150 ppm active ingredient. 6. Set sprayer mechanism to deliver 1 gallon of solution. 7. Fog for 15 minutes for an average 2100 cu. ft. room. For different room sizes, vary spray time proportionately to ensure complete wetting of exposed surfaces. 8. Wait 2 hours before entering room after treatment. 9. Rinse legging equipment thoroughly with clean water following use.

DANGER: Keep Out of Reach of Children. Corrosive. Causes severe eye and skin damage. Do not get in eyes, on skin or on clothing. Wear goggles or face shield and rubber gloves when handling. Hazard if swallowed. Avoid contamination of food.

FIRST AID: In case of contact immediately wash eye, or skin with plenty of water for at least 15 minutes. For eyes call a physician. Remove and wash all contaminated clothing and footwear. If swallowed, drink 8 to 16 oz. egg white solution if that is not available. Drink large quantities of water. Call a physician.

NOTE TO PHYSICIAN: In case of contact immediately contact the use of this product. Most cases require respiratory check, respiratory depression and other therapy may be needed. Rinse empty stomach thoroughly with water and discard.
