Betco Lemon

Neutral pH Disinfectant Deodorant/Detergent

Kills HIV on Pre-cleaned Environmental Surfaces / Objects Previously Soiled With Blood / Body Fluids* Kills Pseudomonas, Salmonella and Staphylococcus*

ACTIVE INGREDIENTS:
Allyl (C₆H₅CH₂)₂ 20%; Cr₂O₃ 14%
dimethyl benzyl ammonium chloride 2.00%
INERT INGREDIENTS: 75.99%

TOTAL 100.00%

KEEP OUT OF REACH OF CHILDREN CAUTION

See directions panel for additional pre-cautionary and practical treatment statements.
FOR INDUSTRIAL AND INSTITUTIONAL USE ONLY
BY TRAINED PERSONNEL.

EPA REG. NO. 4170-17
EPA EST. NO. 4170-04-1

313

DESCRIPTION
This product is effective against a wide variety of gram-positive and gram-negative bacteria. It is also an excellent disinfectant. It is especially effective in controlling odors that are bacterial in origin.

This product mixes readily with water and makes a clear, stable solution. In use dilution, it is non-corrosive and non-reacting to plastic, vinyl, synthetics, enamel, glass and most common metals. Has a pleasant lemon odor.

PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION

KEEP OUT OF REACH OF CHILDREN. Harmful if swallowed. Avoid getting in eyes or on skin. In case of contact, wash thoroughly with water. If irritation persists, get medical attention. Avoid contamination of food or feedstuff. Avoid breathing spray mist.

STORAGE AND DISPOSAL

Store in original container only. Do not contaminate water, food or feed by storage or disposal. Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility. These must be equivalent. Then offer for recycling or reconditioning or puncture and dispose of in a sanitary landfill, or by other procedures approved by state and local authorities.

*The disinfectant is effective at a dilution of 5 oz/gal against *Pseudomonas aeruginosa* PRO-10, *Salmonella choleraesuis* ATCC 10738 and *Staphylococcus aureus* ATCC 6536 when tested by the A.O.A.C. Use Dilution Test Method for pre-cleaned, nonporous hard surfaces.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. For routine and general disinfection of hard, non-porous surfaces (glass, metal, plastic, painted porcelain, aluminum, tile, leather, vinyl, enamel and finished wood surfaces) on walls, floors, fixtures and furnishings in institutional and industrial areas.

CLEANING - Whenever practical flush porous soils with water. For cleaning, use 2 to 8 ounces of this product per gallon of water. Cleaning may be accomplished with a clean mop, sponge, sponge, wet vacuum system, or a mechanical spraying device. After cleaning, remove suspended soils with a clear water rinse, vacuum pick up or by sponging with a clean mop, sponge, sponge or cloth.

DISINFECTANT - Before disinfecting, prepare surfaces as directed above. Then, prepare 5 ounces of this product per gallon of water and thoroughly wet the surfaces to be disinfected. For disinfecting contagious disease areas, use 8 ounces per gallon of water. The disinfecting solution must contact the surface for 10 minutes for proper disinfection. If desired, the surfaces may be rinsed with clear water or wiped with a clean damp cloth. This product has not been tested for effectiveness against *Mycobacterium tuberculosis* and must not be relied upon when tuberculosis activity is involved.

FOR CLEANING AND DEODORIZING GARBAGE CANS, GARBAGE TRUCKS, INDUSTRIAL WASTE RECEPENTS AND OTHER GARBAGE HANDLING EQUIPMENT - It is especially important to practice preferably using a mechanical spraying device, in order for the disinfectant to perform properly. Then apply a working solution of 16 ounces of this product per gallon of water.

FOR CLEANING OF WALLS, FLOORS AND INDUSTRIAL WORK AREAS - Use 8 ounces per gallon of water. The use of rubber gloves is recommended for personnel doing extensive hand cleaning.

*In health care settings or other settings in which there is an expected likelihood of soiling of "high-risk" objects with blood or body fluids, and in which the surfaces objects likely to be soiled with blood or body fluids can be associated with the potential for transmission of human immunodeficiency virus Type I (HIV-1) (adults and with AIDS), SPECIAL INSTRUCTIONS FOR CLEANING AND DECONTAMINATION AGAINST HIV-1 (AIDS VIRUS) OF SURFACES/ OBJECTS SOILED WITH BLOOD / BODY FLUIDS

PERSONAL PROTECTION: When handling items soiled with blood or body fluids use disposable latex gloves, gown, mask, or eye coverage.

CLEANING PROCEDURES: Blood and other body fluids must be thoroughly cleaned from surfaces and objects before application of disinfectant.

CONTACT TIME: Allow surface to remain wet for 10 minutes.

DISPOSAL OF INFECTIOUS MATERIALS: Blood and other body fluids should be autoclaved and disposed of according to federal, state, and local regulations for infectious waste disposal.

FOR MILDEW CONTROL - Use on interior, exterior, tile and plastic to control mildew. Follow directions for disinfection. Repeat treatment every seven days, or when new growth appears. The product may be used through automatic floor scrubbing equipment and pressure washers. The product must not be used on food contact surfaces.

Authorized by the USDA for use in federally inspected meat and poultry plants.
