#### 1. PROHIBITIONS

Do not contaminate water, food, or feed by storage or disposal open dumping is prohibited

#### 2. PESTICIDE DISPOSAL

Pesticide, spray mixture, or rinsate that cannot be used or chemically processed should be disposed of in a landfill. Approved for pesticides or buried in a safe place away from water supplies.

#### 3. CONTAINER DISPOSAL

(a) Reseal container and offer for reconditioning, or (b) Triple rinse (or equivalent) and Offer for recycling, reconditioning, or disposal in approved landfill, or bury in a safe place.

#### 4. GENERAL

Consult federal, state or local disposal authorities for approved alternative procedures.

# BETCO MOSQUITO FOGGING SPRAY

#### ACTIVE INGREDIENTS:

Pyrethrins	0.050%
*Piperonyl butoxide technical	0.125%
**Malathion	2.000%
Aromatic petroleum derivative solvent	7.625%
Petroleum distillate	90.200%
	100.000%

\*Equivalent to 0.100% (butylcarbityl) (6-propyl-  
piperonyl) ether and to 0.025% related compounds

\*\*0,0-Dimethyl dithiophosphate of diethyl mercapto-  
succinate

## KEEP OUT OF REACH OF CHILDREN CAUTION

See side panel for additional precautionary statements.  
**FOR INDUSTRIAL AND INSTITUTIONAL USE  
 ONLY. ONLY FOR SALE TO, USE, AND STORAGE  
 BY SERVICE PERSONS, JANITORS, OR MAINTENANCE PERSONNEL.**

Harmful if swallowed. Avoid Breathing of fog or mist. Avoid contact with skin: wash thoroughly after using. Avoid contamination of feed and foodstuffs.

Do not use in edible product areas of food processing plants, restaurants or other areas where food is commercially prepared or processed. Do not use in serving areas while food is exposed.

E.P.A. EST. NO. 4170-OH-1

E.P.A. REG. NO. 4170-20

### DIRECTIONS

This ready-to-use insecticide may be dispersed through conventional thermol, mechanical or compressed air fogging or spraying equipment.

To control ADULT MOSQUITOES and GNATS: Apply as a fog or fine mist at a rate of 1 to 3 gallons per acre (3 to 9 fluid ounces per 1000 square feet), filling the entire area with vapor. For best results, treat when the wind velocity does not exceed 5 miles per hour. Application in the evening or early morning is recommended. Treat area thoroughly with particular attention to low or marshy locations, shore lines, stagnant pools or ponds and vegetation where mosquitoes may rest. Repeat treatment as necessary, usually once or twice a week.

Using mobile or truck-mounted equipment, the above application rate will result when traveling at a speed of 5 m.p.h. if a 400 foot wide swath is treated with insecticide dispersed at a rate of from 240 to 620 gallons per hour.

**FLIES AND MOTHS, OUTDOORS:** Fill area with fog or mist to kill flies and small flying moths (millers). Repeat treatment as necessary, usually once or twice a week.

**TEMPORARY REDUCTION OF ANNOYANCE:** The aforementioned applications for mosquitoes, gnats, flies and moths will afford temporary reduction of annoyance from these pests in public gathering places such as parks and open sports stadia. Application should be made prior to attendance.

**ANTS, SPIDERS, CRICKETS, ROACHES, AND BOX ELDER BUGS:** To control crawling insects, direct a coarse spray at the insects and infested areas applying enough to wet the surface without any run-off of the spray. Repeat after 2 to 4 weeks, or as needed.
