**FOR INDUSTRIAL AND INSTITUTIONAL USE ONLY**

75

**DESCRIPTION**

This disinfectant cleaner is designed for hospital, general industrial, and institutional use. It may be used to clean and disinfect toilet bowls, urinals, porcelain, sinks, bathtubs, shower tile, and ceramic tile floors. Its broad spectrum activity cleans, descales, deodorizes, and disinfects in one easy step.

**DIRECTIONS FOR USE**

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

**TO CLEAN AND DISINFECT TOILETS AND URINALS:** Remove water by forcing it over the trap with swab mop. Saturate swab with disinfectant cleaner and wet all surfaces thoroughly. It is most important to swab under the rim of bowl or urinal to clean and disinfect water outlets. Allow this disinfectant cleaner to remain for at least 10 minutes until all rust, scale, and stains are loosened. Rinse by flushing.

**TO CLEAN AND DISINFECT SINKS, BATHTUBS, SHOWER STALLS, DRINKING FOUNTAINS, AND CERAMIC TILE FLOORS:** Dilute one part of this disinfectant cleaner with two parts water and apply to wet all surfaces thoroughly with swab mop, sponge, brush, or cloth. Allow disinfectant cleaner to remain for at least 10 minutes. Rinse with water after cleaning.

**FOR HEAVILY SOILED AREAS:** A preliminary cleaning is required before disinfection can occur. At a dilution of one part disinfectant cleaner to two parts water, this product has shown broad spectrum activity against microorganisms commonly found in toilet bowls and urinals and has been evaluated in the presence of 5% serum and found to be effective against the following organisms by the AOAC Use-Dilution Test:

**PSEUDOMONAS AERUGINOSA**  
**STAPHYLOCOCCUS AUREUS**  
**SALMONELLA CHOLERAESUIS**

This product is not to be used as a terminal sterilant/high level disinfectant on any surface or instrument that (1) is introduced directly into the human body, either into or in contact with the bloodstream or normally sterile areas of the body, or (2) contacts intact mucous membranes but which does not ordinarily penetrate the blood barrier or otherwise enter normally sterile areas of the body. This product may be used to pre-clean or decontaminate critical or semi-critical medical devices prior to sterilization or high-level disinfection.
