DESCRIPTION

This formulation is a "one step" disinfectant-cleaner-mildewstat-odorant which is effective in water up to 400 ppm hardness in the presence of 5% serum contamination at a 1:20 dilution (6.4 ounces/gallon). This formulation will remove hard water deposits and lime soap build-ups when used as directed. For hospital, institutional, and industrial use.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. WHEN USING WITH DISPENSING SYSTEM, POUR ENTIRE QUART BOTTLE INTO 5 GALLONS OF WATER TO MAKE A POWERFUL READY-TO-USE DISINFECTANT/CLEANER. Remove gross filth or heavy soil. Apply use-dilution to glazed porcelain and glazed ceramic tiles, bathtubs, shower stalls, sinks, urinals, toilet bowl surfaces, related fixtures, and other hard (inanimate), nonporous, environmental surfaces with a cloth, mop, or coarse spray device so as to thoroughly wet all surfaces. Allow to remain wet for at least ten minutes. Prepare fresh solution daily or more often when the solution becomes diluted or soiled.

Heavy Duty Cleaning-For heavily soiled areas, a preliminary cleaning is required. Use product undiluted, and apply to soiled surfaces. Surfaces must remain wet for ten minutes.

Hard Water Disinfection-At a 1:20 dilution (6.4 ounces/gallon) when evaluated by the AOAC Use-Dilution Test, this formulation is effective in the presence of 5% blood serum and 400 ppm hard water and found to be effective against a broad spectrum of gram-negative and gram-positive organisms as represented by: *Pseudomonas aeruginosa*, *Staphylococcus aureus*, *Salmonella choleraesuis*, *Escherichia coli*, *Streptococcus pyogenes*, *Klebsiella pneumoniae*, *Enterobacter aerogenes*, *Proteus mirabilis*, *Shigella dysenteriae*, *Brevibacterium ammoniagenes*, *Salmonella typhi*, and *Serratia marcescens*.

Fungistatic Activity (Mold and Mildew Control)-At 4.8 ounces/gallon use level, this formula will effectively control the growth of mold and mildew and odors caused by them when applied to hard, nonporous surfaces (as indicated in general instructions above). Fungistatic activity was confirmed by the method for evaluation of mildewstats on hard surfaces against: *Aspergillus niger* ATCC 6275 and *Trichophyton mentagrophytes* ATCC 9533. Allow to dry on surface and repeat when mildew growth returns.

Kills HIV-1 on pre-cleaned environmental surfaces/objects previously soiled with blood/body fluids in health care settings or other settings in which there is an expected likelihood of soiling of inanimate surfaces/objects with blood or body fluids, and in which the surfaces/objects likely to be soiled with blood or body fluids can be associated with the potential for transmission of human immunodeficiency virus Type 1 (HIV-1) (associated with AIDS).

SPECIAL INSTRUCTIONS FOR CLEANING AND DECONTAMINATION AGAINST HIV-1 ON SURFACES/OBJECTS SOILED WITH BLOOD/BODY FLUIDS:

PERSONAL PROTECTION: When handling items soiled with blood or body fluids use disposable latex gloves, gowns, masks, or eye coverings.

CLEANING PROCEDURE: Blood and other body fluids must be thoroughly cleaned from surfaces and objects before application of this product.

CONTACT TIME: Allow surface to remain wet for 10 minutes.

DISPOSAL OF INFECTIOUS MATERIAL: Blood and other body fluids should be autoclaved and disposed of according to local regulations for infectious waste disposal.

Virucidal Performance-At a 1:20 dilution (6.4 ounces/gallon) use level, this formulation was evaluated in the presence of 5% blood serum and 400 ppm hard water and found to be effective against Herpes Simplex Type 2 on hard, nonporous, inanimate, environmental surfaces.
